

**MISSOURI DEPARTMENT OF HEALTH AND SENIOR SERVICES  
LOCAL PUBLIC HEALTH AGENCY INFRASTRUCTURE  
CAPACITY ASSESSMENT REPORT  
NOVEMBER 2005**

Facts contained in this report were obtained from a survey questionnaire completed in July 2005 by 114 local public health agencies in Missouri. The purpose of the survey is to gather information about public health system capabilities, identify variation among agencies, and to provide agencies a means to compare themselves with peer agencies. This report reflects capacity of administration, facility, workforce, services and programs offered, and information related to their governing bodies.

The information in this report is presented as a collection of all responses, and for comparison, is sorted by various sizes of population served. Some data is compared to results of the same survey completed in the previous year.

The Center for Local Public Health Services in the Missouri Department of Health and Senior Services prepared this report. For further information call 573-751-6170.

[Table of Contents](#)

## TABLE OF CONTENTS

### CHAPTER 1 - ORGANIZATIONAL CAPACITY

- I. [Summary of Statewide Findings Related to Local Public Health Agency Organizational Capacity - 2005](#)
- II. [Variation In Organizational Capacity by Size of Population Served - 2005](#)
- III. [Graph Comparisons of Organizational Capacity](#)
- IV. [Data Tables Related to Organizational Capacity](#)

### CHAPTER 2 - WORKFORCE

- I. [Summary of Findings Related to Local Public Health Agency Workforce - 2005](#)
- II. [Variation in Local Public Health Agency Workforce by Size of Population Served - 2005](#)
- III. [Graph Comparisons of Workforce](#)
- IV. [Data Tables Related to Workforce](#)

### CHAPTER 3 - SERVICES AND PROGRAMS

- I. [Summary of Services and Programs - 2005](#)
- II. [Variation in Services and Programs by Size of Population Served - 2005](#)
- III. [Graph Comparisons of Services and Programs](#)
- IV. [Data Tables Related to Services and Programs](#)

### CHAPTER 4 - ACTIVITIES RELATED TO GOVERNING BODIES

**I. Summary of Statewide Findings Related to Local Public Health Agency Governing Bodies - 2005**

**II. Variation in Activities Related to Governing Bodies by Size of Population Served - 2005**

**III. Graph Comparisons of Governing Body Activities**

**IV. Data Tables Related to Governing Body Activities**

## **CHAPTER 1**

### **I. SUMMARY OF STATEWIDE FINDINGS RELATED TO LOCAL PUBLIC HEALTH AGENCY ORGANIZATIONAL CAPACITY - 2005**

Progress is noted from 2004 to 2005 in a number of dimensions of capacity to provide essential public health services. All agencies now have a system to assure that staff can be contacted at all times if emergencies occur or communicable diseases need to be reported. Agencies are reporting increased use of technology such as Geographic Information Systems (GIS). An increasing number of agencies have their own web site to share information with the public, and a number of agencies have developed alternative capacity to communicate during disaster situations.

**Availability:** 14% of local public health agencies in Missouri reported they are open for business at their main facility less than 40 hours a week during 2005. Most agencies (68%) serve the public between 40 and 44 hours each week, and 18% are open 45 hours or more each week. (See Graph 1.1 and Data Table 1.1)

**Satellite Locations:** 21% of agencies report having branch locations, down from 23% in 2004. Of the 24 agencies with branch offices, 75% are open to provide services less than 8 hours per week during hours other than 8:00 a.m. to 5:00 p.m., while 13% are open 24 or more hours each week during hours other than 8:00 a.m. to 5:00 p.m. (See Graph 1.2.1 and Data Tables 1.2 & 1.2.1)

**Emergency Contact:** 100% of agencies have a system to receive notification and respond to emergencies at all times of the day or night. Cell phones are relied upon by 96% of agencies for after-hours communication, and 84% of agencies provide cell phones for their key staff. Fifty-two percent (52%) of agencies use pagers. Agency staff is contacted after hours by 911 centers, a local law enforcement agency or by an answering service. Seventy-five percent (75%) of the agencies have written protocols for staff response to calls after hours. (See Graphs 1.3.1, 1.3.2.1 & 1.4 and Data Tables 1.3.1, 1.3.2.1 & 1.4)

**Public Health Business Off Site:** over half (52%) of agencies report that from 25% to 49% of their business is conducted outside of their facility. Twenty-three percent (23%) of agencies report that 50% or more of public health business is conducted off site. (See Graph 1.5 and Data Table 1.5)

**Billing for Services:** 97% of agencies bill Medicaid for services, 89% bill Medicare, and 31% bill private insurance companies. A majority of agencies (81%) charge their clients for some services. Forty-eight local public health agencies (42%) also receive payment for services they provide to other agencies. (See Graph 2.1 and Data Table 2.1)

**Technology:** The percentage of local agencies with a web site increased from 49% in 2004 to more than half (54%) in 2005. Twenty-nine (29) agencies (25%) reportedly use GIS technology for public health purposes like tracking sewage systems, water well locations, lead

testing results, communicable diseases, or other applications. (See Graphs 3.1.1 thru 3.1.3, & 3.2.1 thru 3.2.6 and Data Tables 3.1.1 thru 3.1.3 & 3.2.1 thru 3.2.6)

Quality Improvement: 81% of agencies report having designated staff for planning and implementing quality improvement methods across public health programs. However, only 29% of agencies rate their capacity to utilize quality improvement principles throughout their organization as “very good”. Forty-six percent (46%) of agencies report they are doing “okay” in implementing quality improvement methods. Ninety-five percent (95%) of agencies evaluate their programs to determine whether stated goals and outcomes are being achieved. Eighty-two percent (82%) report that quality improvement and customer service characteristics are incorporated into staff performance expectations. (See Graphs 4.1 thru 4.4 and Data Tables 4.1 thru 4.4)

Strategic Planning: 89% of agencies report having a strategic plan. Of the 102 agencies that have a plan, 49% report that it was updated in 2004 or 2005. Forty percent (40%) have not updated their plan for 3 years or more. (See Graphs 6.1 & 6.1.1 and Data Tables 6.1 & 6.1.1)

Sixty-one percent (61%) of agencies report referring to their strategic plan from one to four times during the year; however, 20% do not ever refer to it. Ninety-six percent (96%) of the agencies with a strategic plan involved their staff in its development or revision, 86% involved their governing body, and 54% involved members of their community. Strategic plans are used by 69% of agencies for performance management, 73% use it for budget allocation, and 59% use the plan for marketing. (See Graphs 6.1.2 thru 6.1.4 and Data Tables 6.1.2 thru 6.1.4)

## **CHAPTER 1**

### **II. VARIATION IN ORGANIZATIONAL CAPACITY BY SIZE OF POPULATION SERVED - 2005**

**Availability:** 13% of agencies serving populations of 20,000 or fewer, and 20% of agencies that serve populations from 20,001 to 40,000 are open less than 40 hours each week. No agencies that serve populations greater than 80,000 are open less than 40 hours each week, in fact a majority of the largest agencies (54%) are open from 45 to 50 hours each week. (See Graph 1.1 and Data Table 1.1)

**Satellite Locations:** agencies serving populations of 20,000 or fewer are least likely to operate satellite facilities; 9% have satellite locations. Agencies that serve populations 40,001 to 80,000 have the highest percentage for satellite locations (44%). Half (50%) of the largest agencies with satellite locations have only 1 site, but 33% maintain from 6 to 10 different locations. (See Data Table 1.2)

**Emergency Contact:** eighty-five percent (85%) of the agencies serving populations greater than 80,000 have an answering service and 92% rely upon pagers for emergency contact of staff. Only 40% of agencies serving populations from 20,001 to 40,000 use pagers for this purpose. Cell phones are the most common means of after-hours contact regardless of agency size, and the percentage of agencies using them ranges from 95% of agencies serving populations of 20,000 or fewer to 100% of agencies serving populations over 40,000. Ninety-two percent (92%) of the largest agencies provide cell phones for their key staff compared to 76% of the smallest agencies. (See Graphs 1.3.1 & 1.3.2.1 and Data Tables 1.3.1 & 1.3.2.1)

**Public Health Business Off Site:** the percentage of time that agency staff spends in the community, or otherwise working outside of agency offices varies by size of population served. Those that serve populations fewer than 20,000 are most likely to work within their offices; 35% of them spend less than 25% of the time conducting business off site. All sizes of agencies are more likely to spend from 25% to 49% of their staff's time working out in communities, however, 62% of the largest agencies do so compared to 44% of the smallest agencies. (See Graph 1.5 and Data Table 1.5)

**Billing for Services:** agencies serving populations greater than 80,000 are less likely than other agencies to bill a third party for services they provide. Ninety-two percent (92%) of them bill Medicaid compared to 98% of agencies serving populations fewer than 20,000 and 97% of those serving populations from 40,001 to 80,000. Sixty-nine percent (69%) of the largest agencies bill Medicare, compared to 93% of agencies serving populations of 20,000 or fewer, and only 23% bill private insurance compared to 35% of agencies serving populations fewer than 20,000. Ninety-four percent (94%) of the agencies serving populations from 40,001 to 80,000 charge their clients for services. Eighty percent (80%) of agencies serving populations of 20,000 or fewer and 70% of agencies serving populations between 20,001 and 40,000 do so. Ninety-two percent (92%) of agencies serving populations over 80,000 charge clients for services. (See Graph 2.1 and Data Table 2.1)

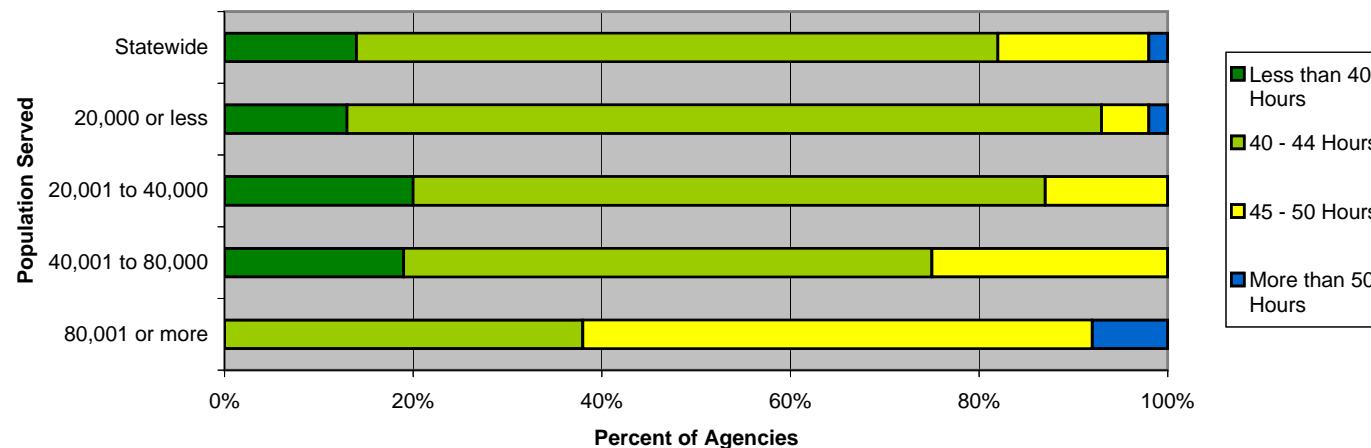

Technology: ninety-two percent (92%) of agencies that serve populations greater than 80,000 have a web site compared to only 38% of those serving populations fewer than 20,000. The percentage of agencies with a web site in the 2 groups serving other population sizes ranges from 60% to 69%. The largest agencies are also most likely to use Geographic Information Systems (GIS); 85% of them are using this technology. Fifty-six percent (56%) of agencies serving populations between 40,001 and 80,000 use GIS, but only 5% to 20% of agencies in groups serving smaller population sizes do so. (See Graph 3.1.1 thru 3.1.3 and Data Tables 3.1.1 & 3.1.2)

Quality Improvement: seventy-seven percent (77%) of agencies serving populations between over 80,000 have staff designated to lead quality improvement efforts compared to 80% of agencies serving populations fewer than 20,000. Thirty-one percent (31%) of agencies serving populations greater than 40,000 rate their capacity to utilize quality improvement principles and methods as “very good” compared to only 25% of agencies serving populations fewer than 20,000. (See Graphs 4.1 & 4.2 and Data Tables 4.1 & 4.2)

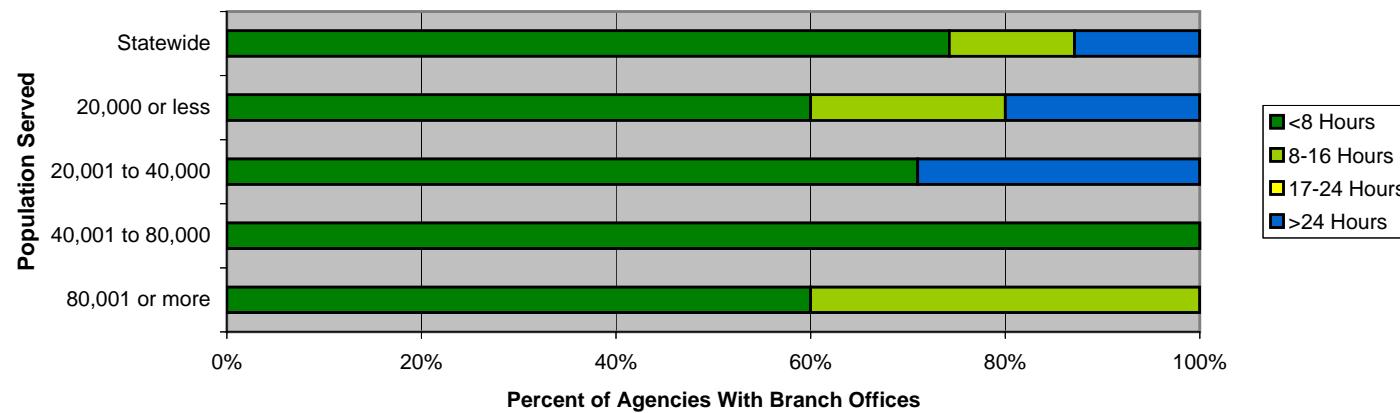

Strategic Planning: agencies serving all population sizes are roughly equal in the likelihood of having a strategic plan; 83% to 92% within each group do so. However, only 52% of agencies serving populations of 20,000 or fewer have updated their plan in the last three years while 79% of those serving populations between 40,001 and 80,000 have done so. Twenty-seven percent (27%) of agencies serving populations of 20,000 or fewer, and 16% of agencies serving populations from 20,001 to 40,000 that have a strategic plan, did not refer to or use their plan in the past year. Seventeen percent (17%) of the largest agencies with a plan referred to it 10 or more times during the last year. (See Graphs 6.1 thru 6.1.2 and Data Tables 6.1 thru 6.1.2)

Agencies serving populations fewer than 20,000 are more likely to involve their governing body in developing or revising their strategic plan; 92% involved their governing body compared to only 75% of agencies serving populations over 80,000. Agencies serving populations over 80,000 are more likely to involve community members in strategic planning with 67% of them doing so, compared to 43% of agencies serving populations from 40,001 to 80,000. All (100%) of the largest agencies refer to their plan for budgeting and resource allocation, while only 64% of agencies serving populations from 40,001 to 80,000 use their plan for this purpose. (See Graphs 6.1.3 & 6.1.4 and Data Tables 6.1.3 & 6.1.4)

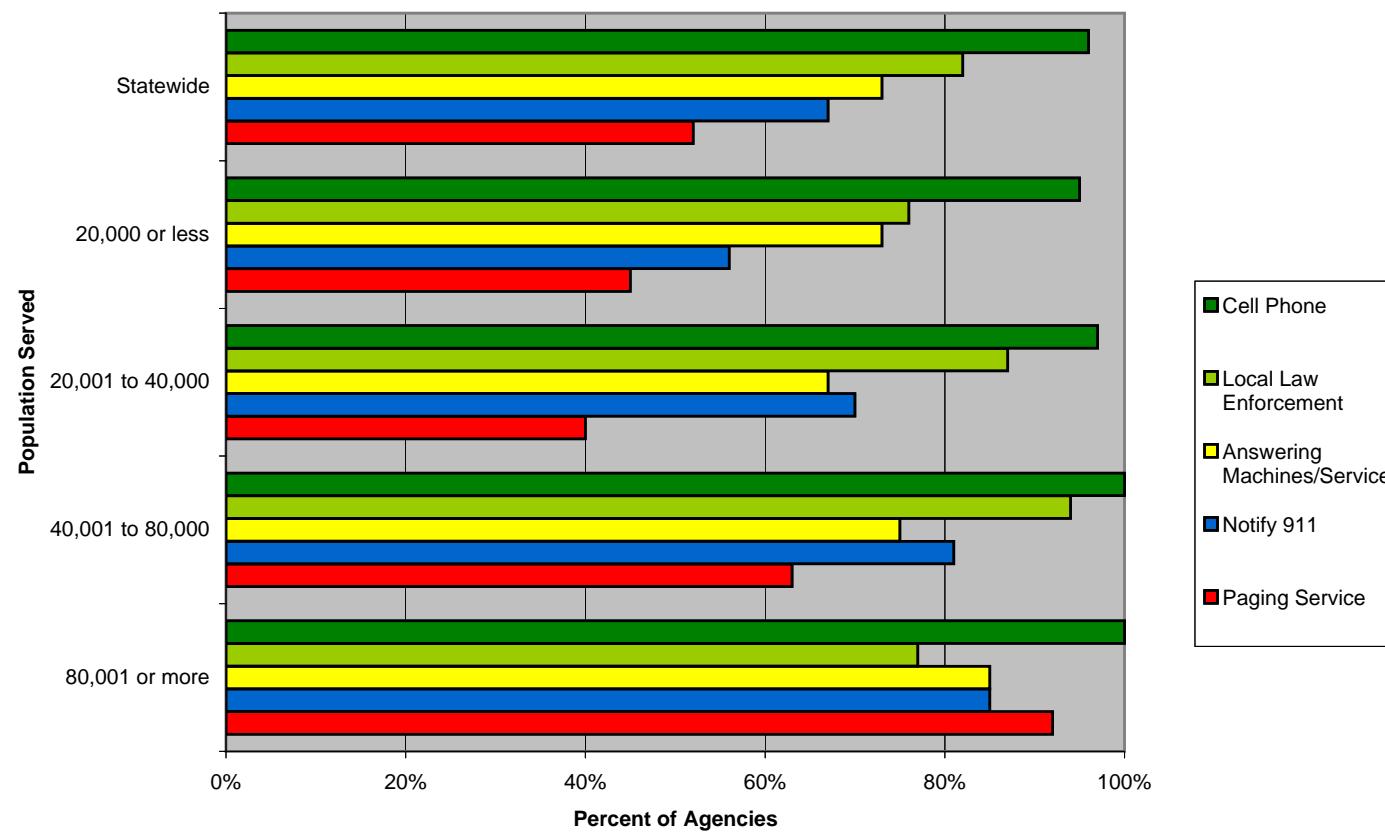

### Hours Per Week Main Facility is Open to Serve Clients - 1.1

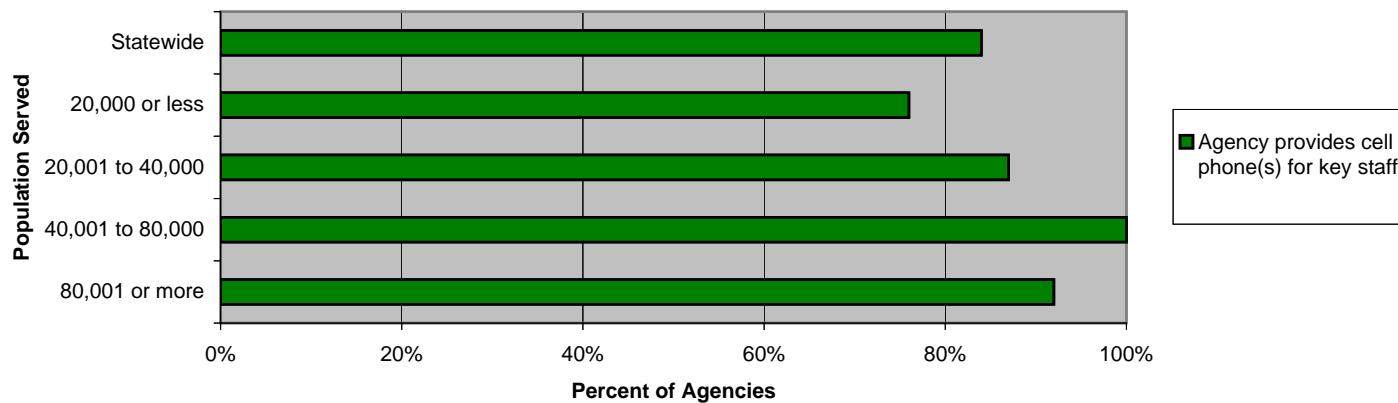

### Hours Per Week Main and Branch Offices Are Open to Clients Other Than 8:00 a.m. - 5:00 p.m. (Reported by 24 Agencies) - 1.2.1

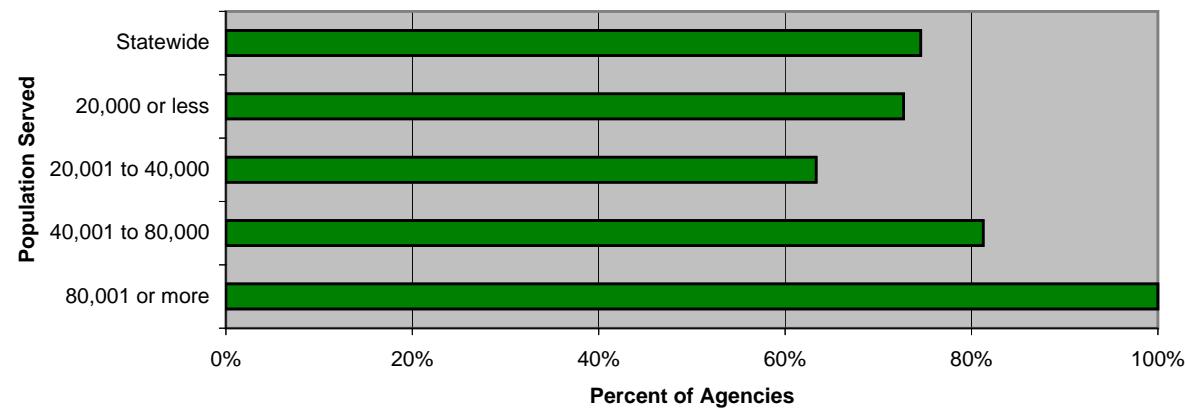

### Systems to Receive and Respond to Emergencies 24/7 - 1.3.1

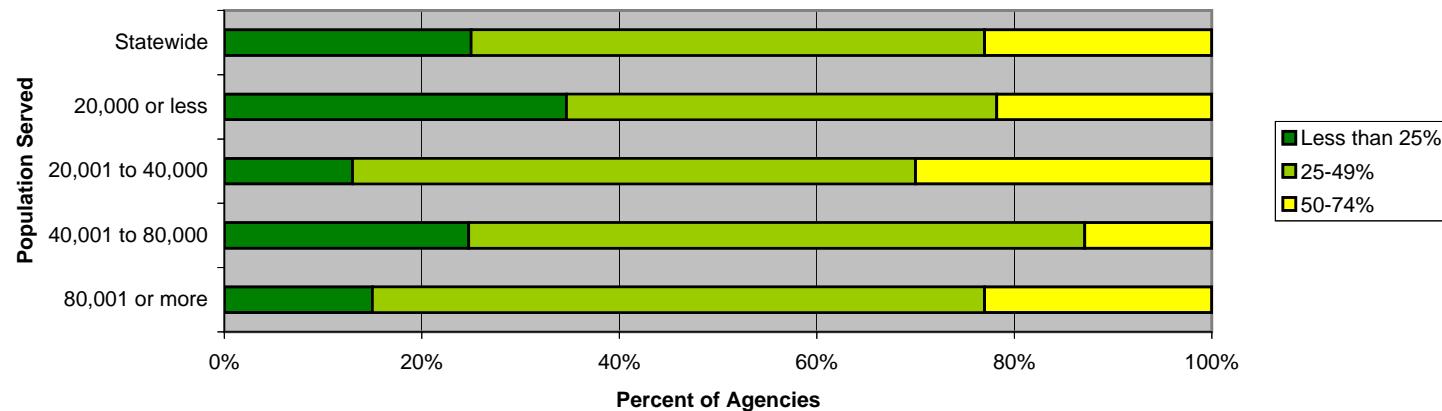

### **Agency Provides Cell Phone(s) For Key Staff - 1.3.2.1**

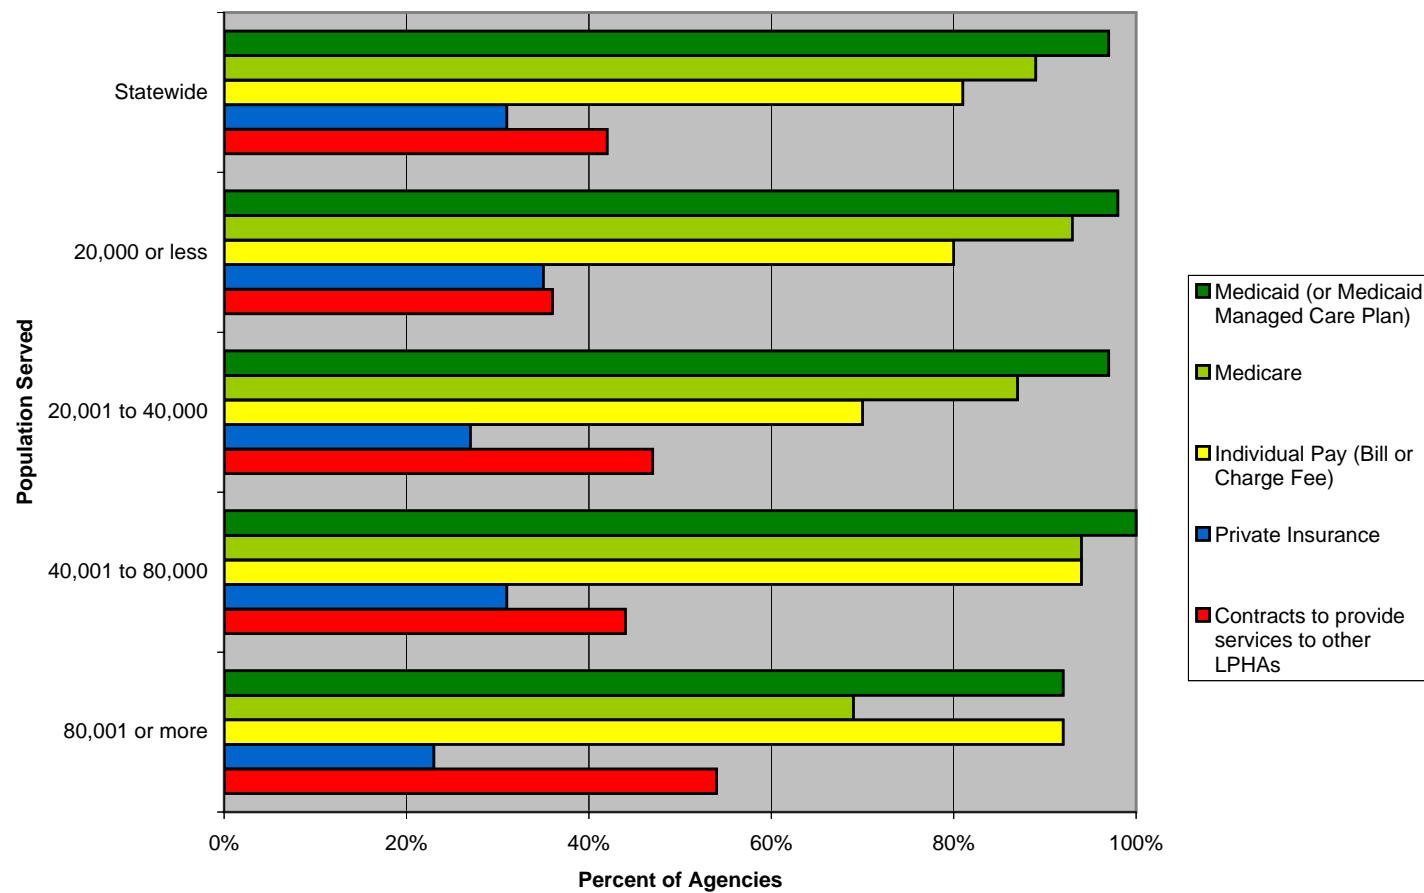

### **Agency Has Written Protocols for Staff Response to Calls After Normal Work Hours - 1.4**

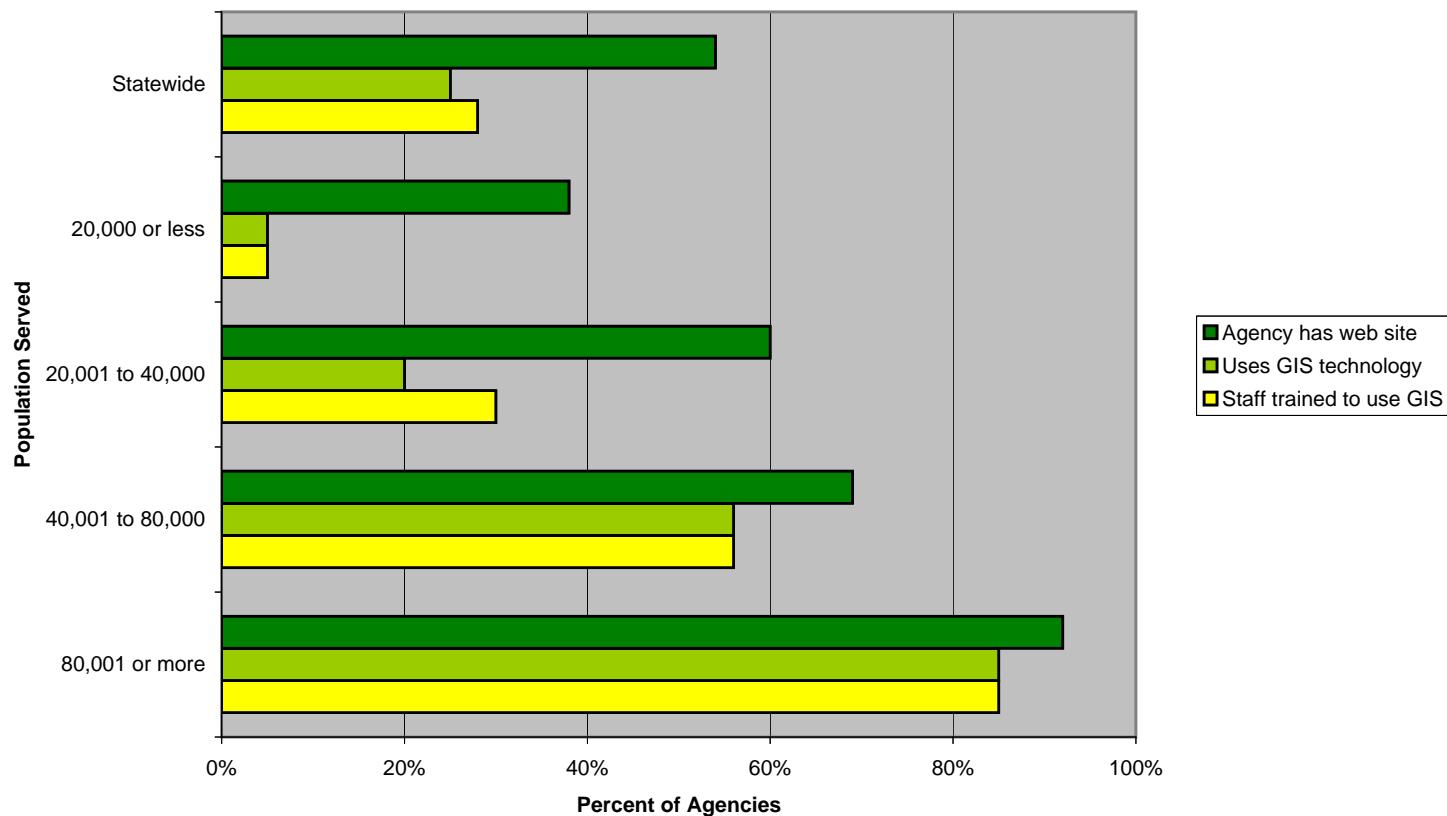

### Percent of Agency's Business Conducted Off-Site - 1.5

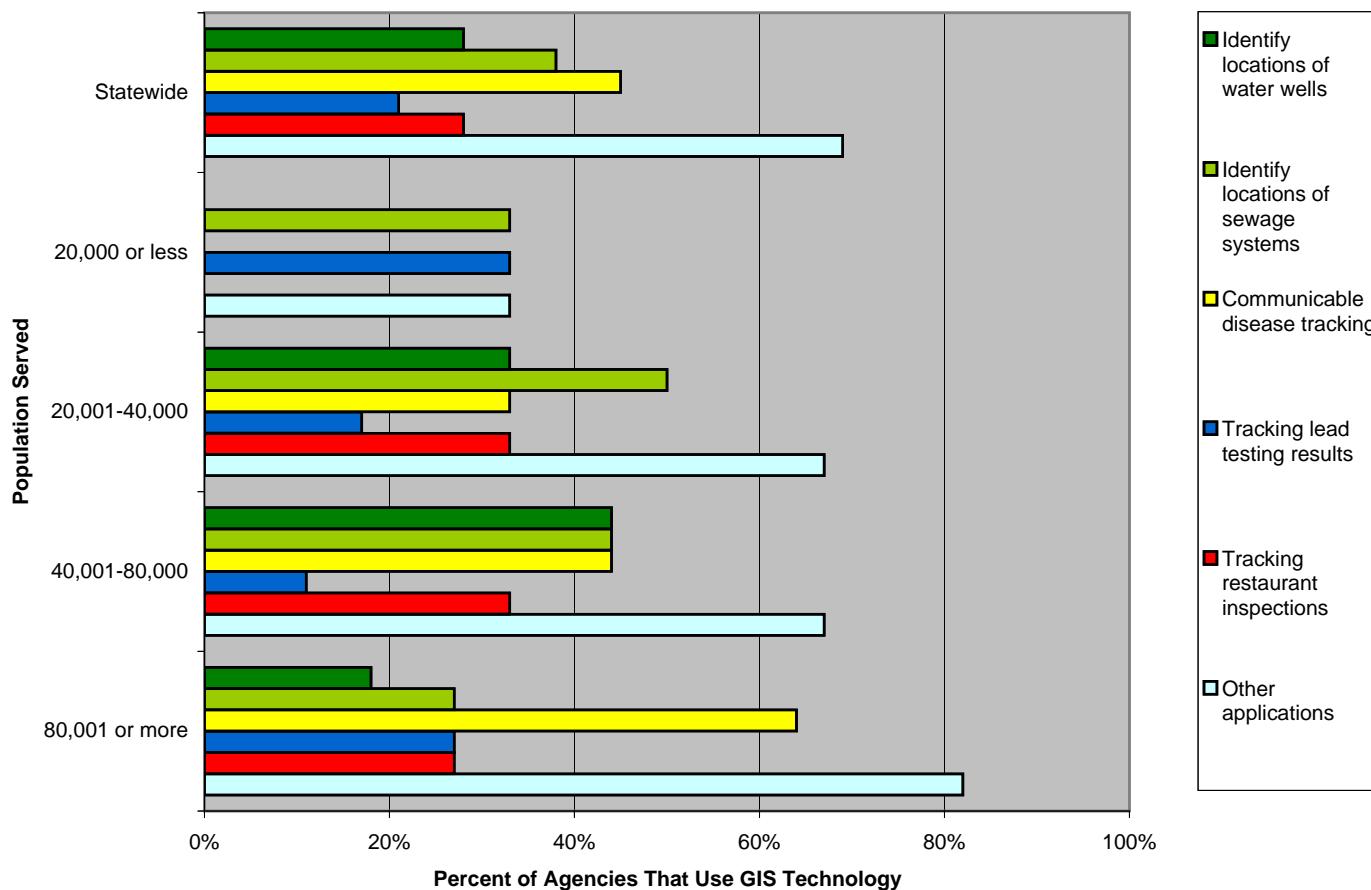

### Agency's Sources of Revenue - 2.1

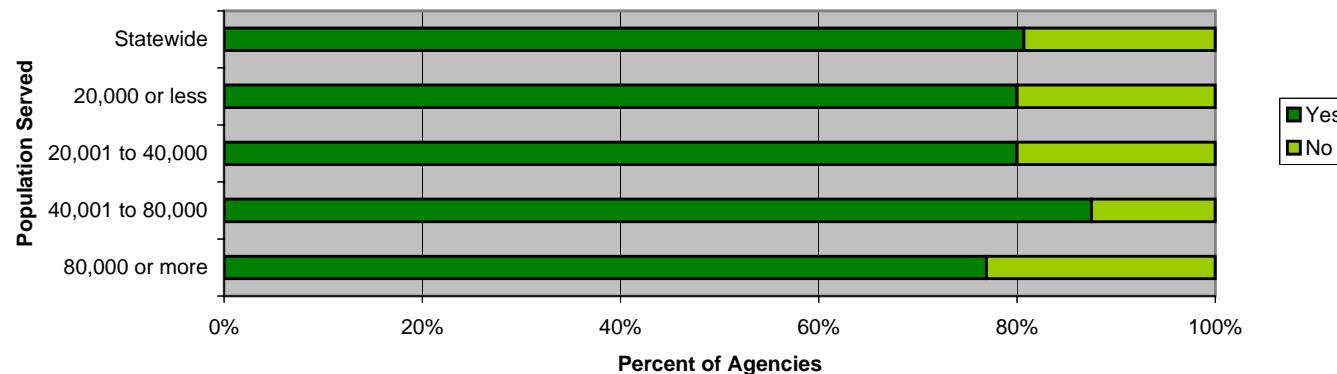

### Agency Uses Technology - 3.1.1 thru 3.1.3

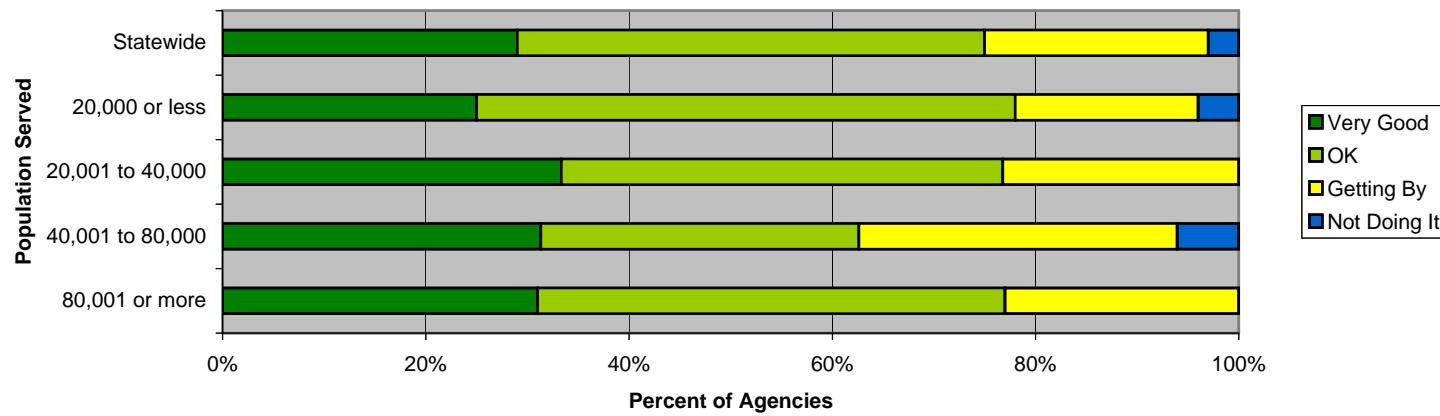

### Agency Uses GIS Technology Reported by 29 Agencies - 3.2.1 thru 3.2.6

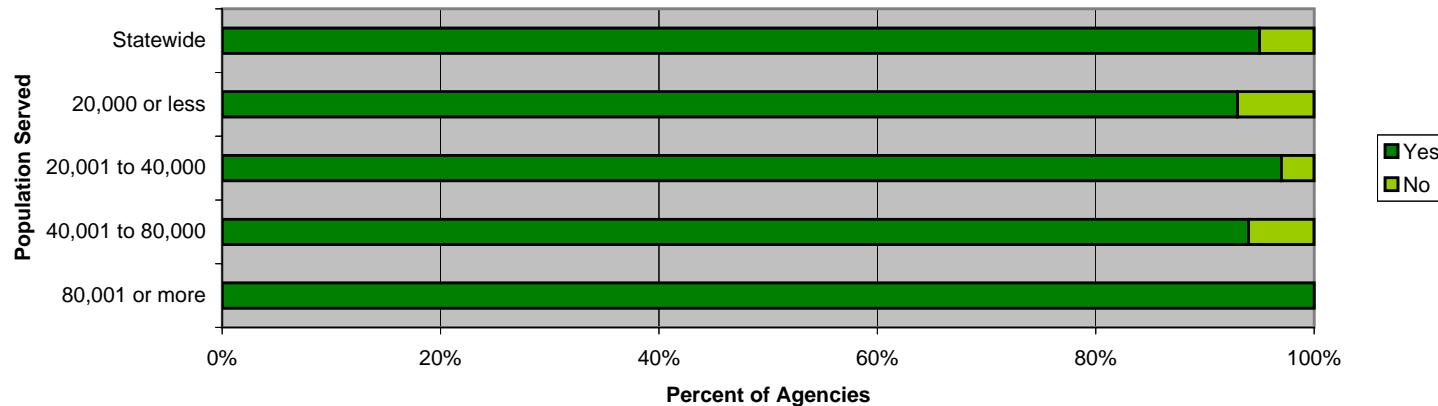

### **Agency Has Designated Staff Responsible for Quality Improvement - 4.1**

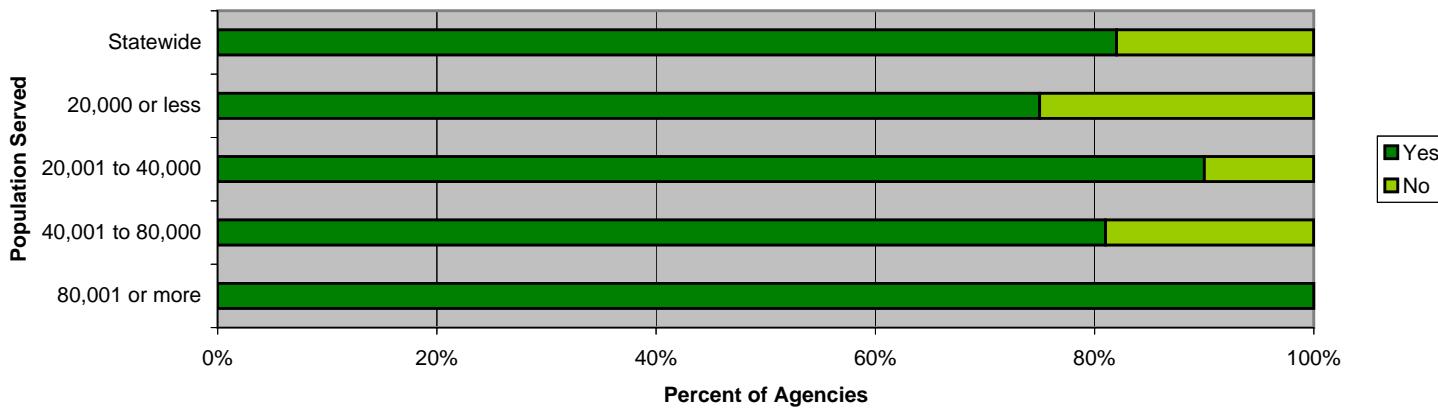

### **Agency Capacity to Utilize Quality Management Principles, Methods, and Tools Throughout Organization - 4.2**

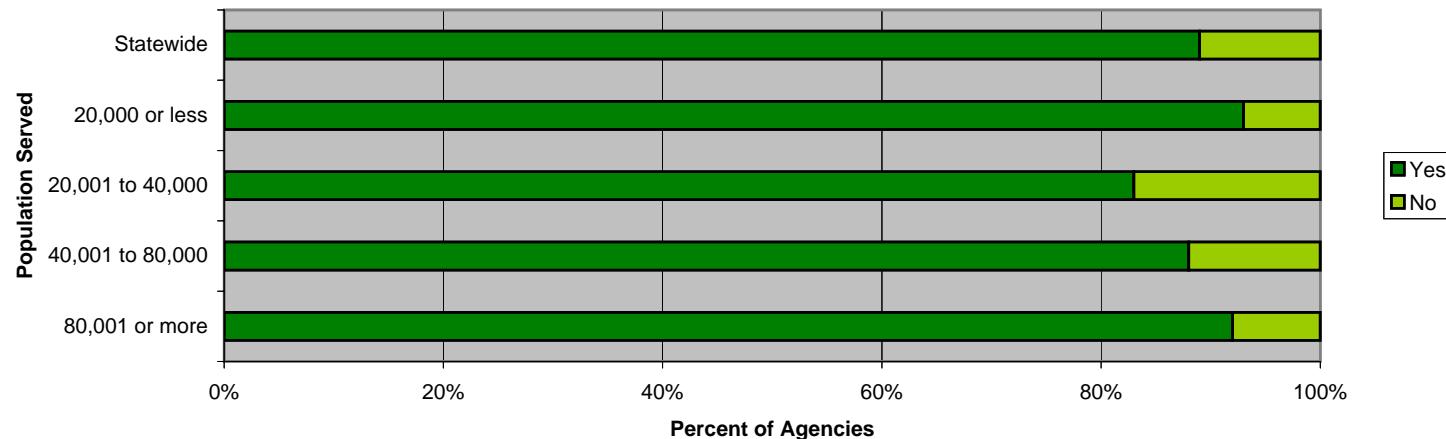

**Agency Evaluates Its Programs to Determine Whether Stated Goals and Outcomes are Being Achieved - 4.3**

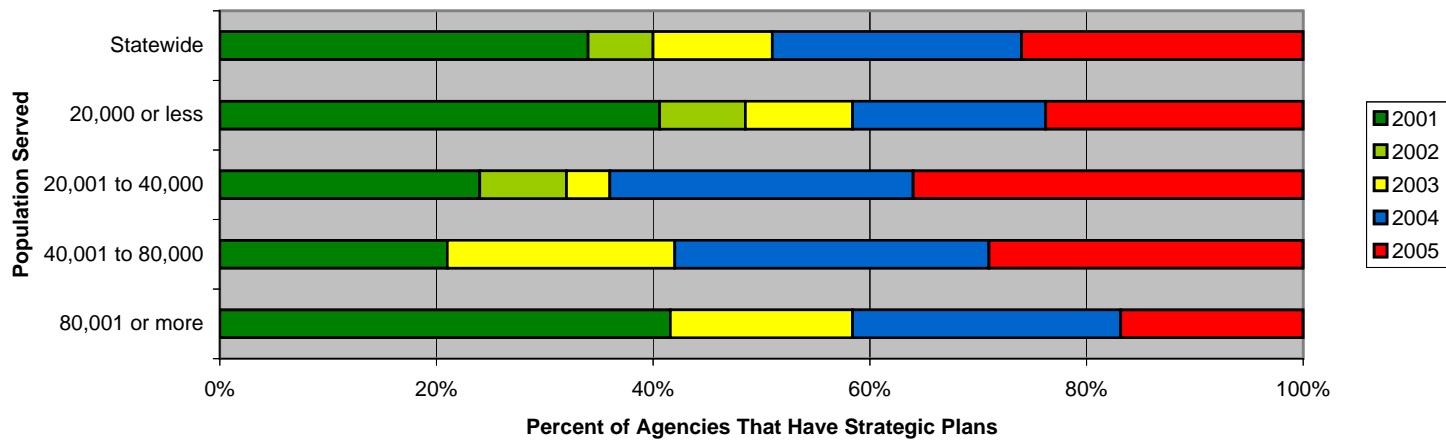

**Agency Incorporates Quality Improvement and/or Customer Service in Employees' Performance Expectations - 4.4**

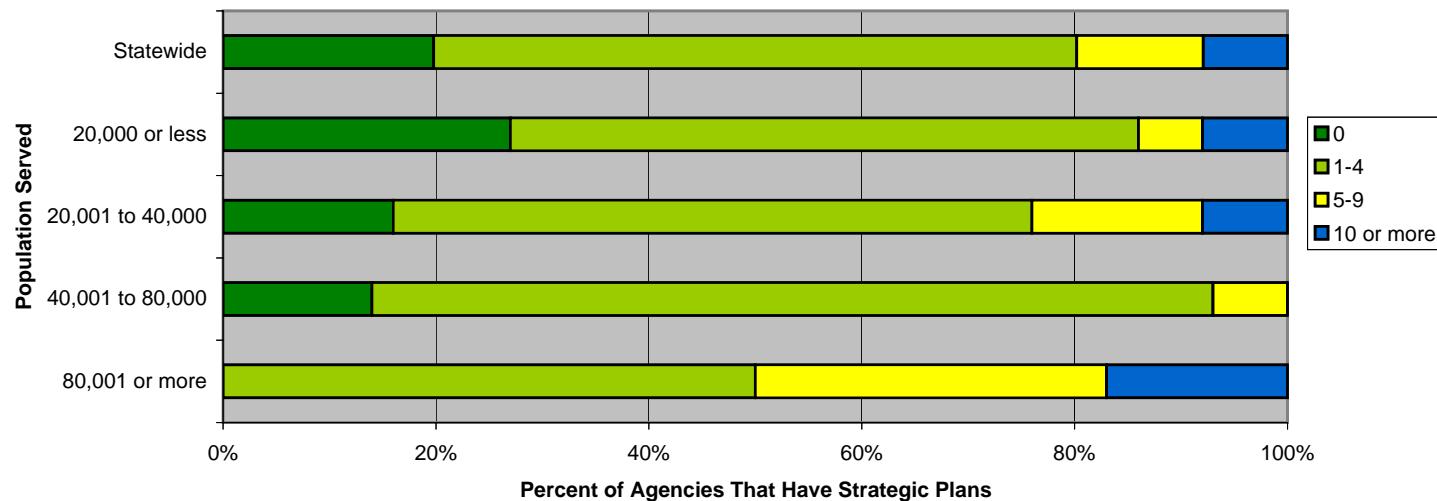

### Agency Has a Strategic Plan - 6.1

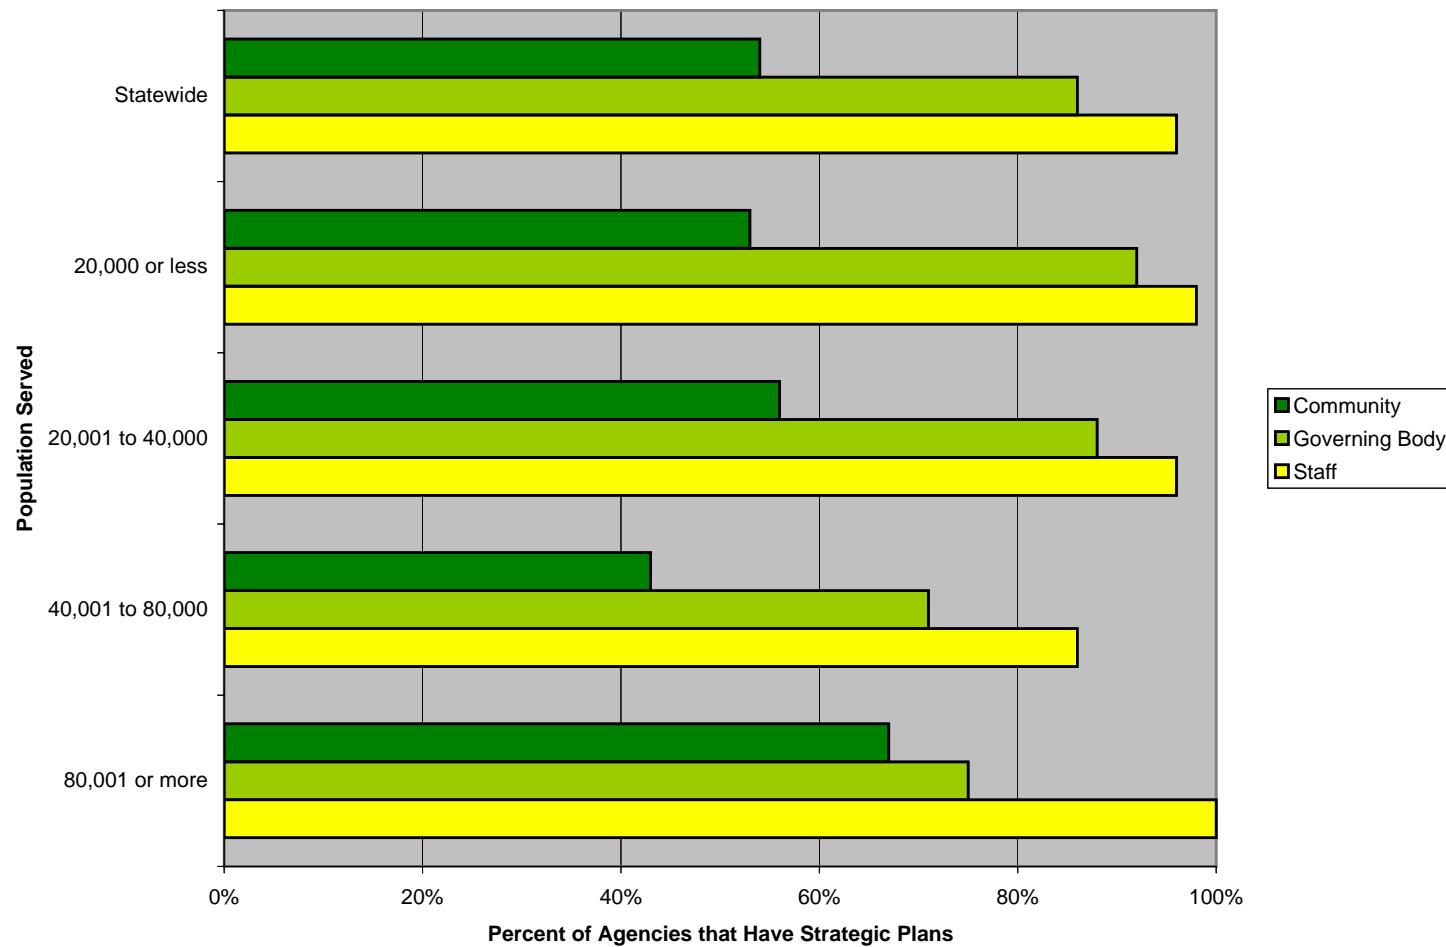

### Agency's Strategic Plan Last Updated - 6.1.1

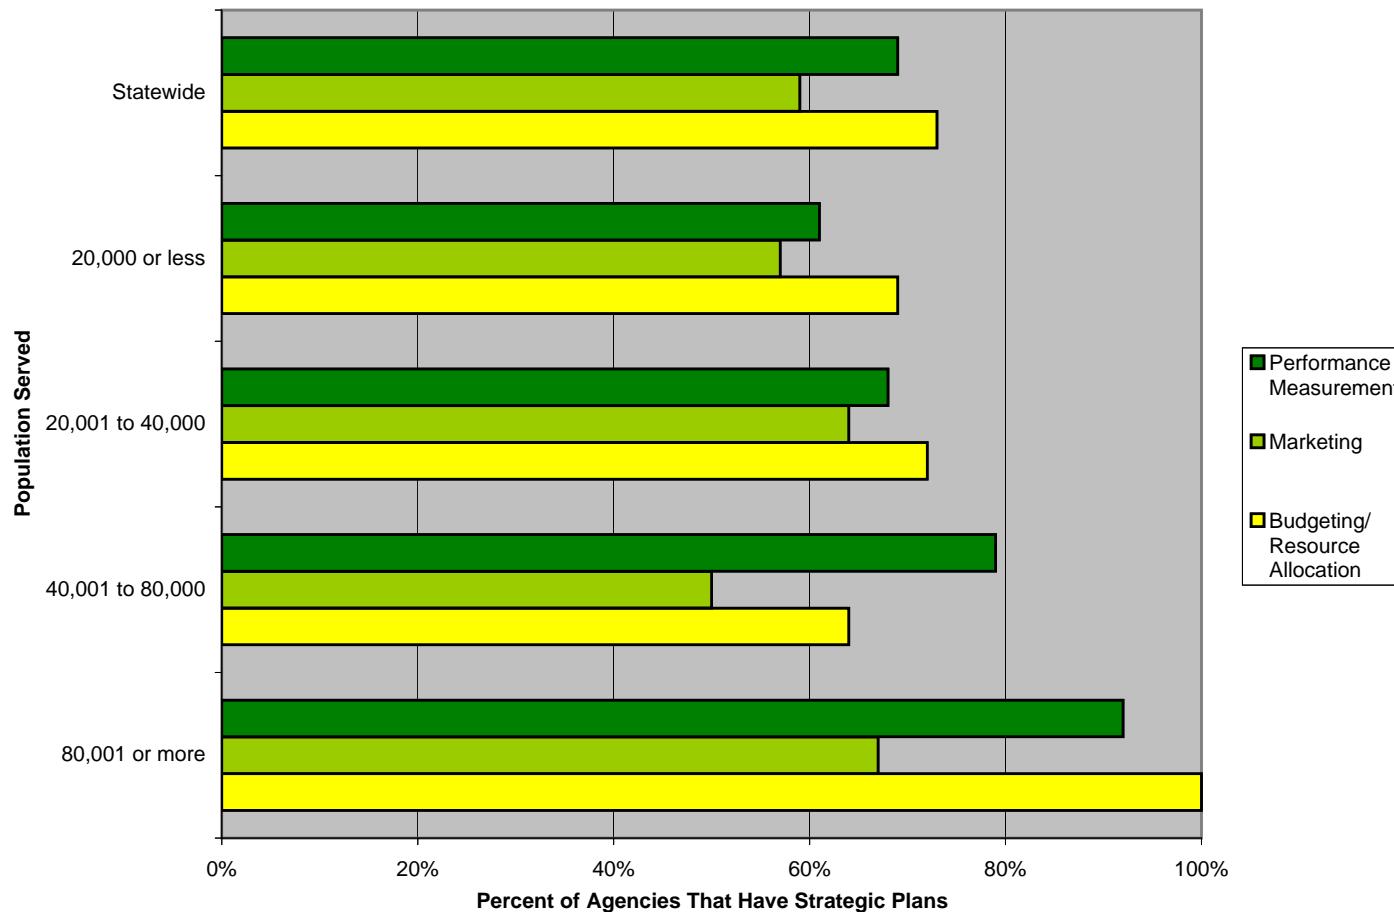

### Times During a Year Strategic Plan is Used - 6.1.2

### **Who Participates in Developing and Revising Agency's Strategic Plan - 6.1.3**

### How Strategic Plan is Used - 6.1.4

## **CHAPTER 2**

### **I. SUMMARY OF FINDINGS RELATED TO LOCAL PUBLIC HEALTH AGENCY WORKFORCE – 2005**

The size of the local public health agency workforce decreased in each of the past four years. However, 2005 showed an increase in the public health workforce with increases in the number of registered nurses and licensed practical nurses (36), clerical and environmental specialists/sanitarians. The benefits provided for local public health employees remained stable, and there were increases in the average annual salary earned by several categories of staff including administrators. (See chart at the end of this chapter that shows the breakdown of types of local agency staff.)

#### **TOTAL LOCAL PUBLIC HEALTH WORKFORCE**

Local public health agencies in Missouri employ 3041 individuals, 79% of whom work full-time. Moderate turnover in staff is verified by the fact that 14% of the current workforce was hired within the past year. (See Graphs 7.1 & 7.2 and Data Tables 7.1 & 7.2)

#### **BENEFITS FOR LOCAL PUBLIC HEALTH WORKERS**

Full time workers in 94% of local public health agencies have health insurance; however, slightly fewer agencies (91%) contribute to payment of premiums. Forty-six percent (46%) of full time local public health workers have access to coverage for dental health services, but only 35% of agencies contribute to dental insurance cost. Eighty-eight percent (88%) of full-time staff in local public health agencies has an available retirement program. Ninety-seven percent (97%) of full time public health workers receive paid sick and 99% have paid vacation leave. (See Graphs 7.3 & 7.4 and Data Tables 7.3 & 7.4)

#### **PROFESSIONAL DEVELOPMENT**

One hundred percent (100%) of the local agencies have staff that participates in continuing education. However, sixty-four percent (64%) of the local agencies require participation in continuing education as a condition of employment. Computer-based training is utilized by staff in 93% of agencies and 92% of agencies' staff utilize satellite education programs. Fewer agencies (47%) have staff that utilize college courses as a means of professional development. (See Graphs 7.5.1 & 7.5.2 and Data Tables 7.5.1 & 7.5.2)

#### **ADMINISTRATORS**

Forty-three percent (43%) of local public health agency administrators are registered nurses, and 4% are Advanced Practice Registered Nurses. Fifty-six percent (56%) of administrators devote all of their time to administrative duties (up from 55% in 2004), and an additional 23% spend three-quarters or more of their time on administration. Sixty-four percent (64%) of local public health agency administrators have successfully completed training on the Incident Command System. The range of educational levels of administrators is wide, from 19% with high school as their highest level of formal education to 26% with master's or doctorate degrees. Fifty-six percent (56%) of administrators have a bachelor's degree or above, and an additional 7% are working towards a bachelor's degree. Nineteen percent (19%) of administrators have been working in their present job for 2 years or less, and nearly half (40%)

of administrators have been the administrator for 5 years or less. The range of annual salary earned by administrators is wide, from less than \$30,000 (3% of administrators) to over \$75,000 (11% of administrators). The largest percentage of administrators (44%) reportedly earn from \$40,000 to \$54,999 annually. An additional 27% earn in the range from \$30,000 to \$39,999. (See Graphs 7.6.1 thru 7.6.7 and Data Tables 7.6.1 thru 7.6.7)

## NURSES

Nurses (registered nurses and licensed practical nurses) continue to represent the largest category of local agency staff (27% of the local public health agency workforce) with a total of 813. There are an additional 49 registered nurses that serve as administrator for their agency. Of the 813 with nursing as their primary focus, 85% are registered nurses and 15% are licensed practical nurses. Seventy-six percent (76%) work full time. Thirty-six of the registered nurses (5%) are working toward a higher degree. Sixty-six percent (66%) of all full-time RNs are reportedly practicing population-based public health nursing. Twenty-nine percent (29%) of the RNs and 16% of the LPNs have successfully completed training on the Incident Command System. (See Graphs 7.7.1.1 thru 7.8.1.3 and Data Tables 7.7.1.1 thru 7.8.1.3)

Ninety percent (90%) of agencies pay their full-time registered nurses an average annual salary of \$30,000 or more (up from 78% in 2004) and 10% pay between \$20,000 and \$29,999. (See Graph 7.7.7 and Data Table 7.7.7)

Fifty-five percent (55%) of agencies have licensed practical nurses (LPNs) on staff. LPNs make up 4% of the local public health workforce. Earnings by full-time LPNs are mainly (82%) in the range from \$20,000 to \$29,999. (See Graphs 7.8.1 thru 7.8.2 and Data Tables 7.8.1 thru 7.8.2)

## ENVIRONMENTAL PUBLIC HEALTH SPECIALISTS

Most agencies (90%) have environmental public health specialists on staff. This group represents the third largest category of local agency staff after nurses and clerical workers (12% of local public health workforce), with a total of 379. Eighty-three percent (83%) of environmental public health specialists work full time. More agencies (59%) pay environmental staff an average annual salary between \$30,000 and \$39,999; 28% pay in the range from \$20,000 to \$29,999. Sixty-seven (67) environmental health workers (18%) are reportedly state certified. Nineteen (19) environmental health workers (5%) reportedly have national registration and 198 environmental health workers (52%) have successfully completed training on the Incident Command System. (See Graphs 7.9.1 thru 7.9.5 and Data Tables 7.9.1 thru 7.9.5.2)

## NUTRITIONISTS

Eighty-two (82) local public health agencies employ 98 nutritionists (3% of local agency workforce). Fifty-nine percent (59%) of staff in these positions work full time. Fifty-one percent (51%) of full-time nutritionists earn an average annual salary range in the range \$30,000 to \$39,999, 14% earn more than \$40,000 annually, and 35% earn in the range from \$20,000 to \$29,999. (See Graphs 7.10.1 thru 7.10.3 and Data Tables 7.10.1 thru 7.10.3)

## **DIETICIANS**

Twenty-six (26) local public health agencies employ dieticians, 55% of which work full time. Ninety-four (94%) are registered dieticians. The majority (83%) of full-time dieticians earn an average annual salary in the range from \$30,000 to \$39,999. (See Graphs 7.11.1 thru 7.11.4 and Data Tables 7.11.1 thru 7.11.4)

## **HEALTH EDUCATORS**

Only (47%) of local public health agencies employ individuals as health educators. Seventy-one percent (71%) of the 82 health educators work full time. Ten of the 82 (12%) are Certified Health Education Specialists. Thirty percent (30%) of full-time health educators earn an average annual salary between \$20,000 and \$29,999, 47% earn between \$30,000 and \$39,999, and the remainder earn over \$40,000. (See Graphs 7.12.1 thru 7.12.4 and Data Tables 7.12.1 thru 7.12.4)

## **SOCIAL WORKERS**

Eighteen (18) local public health agencies employ social workers. Of the 26 employed, 69% work full-time. Ten social workers (38%) are licensed. More social workers (54%) earn an average annual salary in the range from \$30,000 to \$39,999, 23% earn between \$20,000 and \$29,999, and the remainder (23%) earn over \$40,000. (See Graphs 7.13.1 thru 7.13.4 and Data Tables 7.13.1 thru 7.13.4)

## **SUPPORT STAFF**

Clerical support staff makes up 24% of local agency workforce, the second largest category. The 725 individuals (up from 689 in 2004) are primarily full-time employees (87%) and are the lowest paid. Thirty percent (30%) of full-time clerical workers earn an average annual salary less than \$20,000; 65% earn in the range \$20,000 to \$29,999. Sixteen percent (16%) of clerical support staff have successfully completed training on the Incident Command System. (See Graphs 7.14.1 thru 7.14.4 and Data Tables 7.14.1 thru 7.14.4)

## **EPIDEMIOLOGY SPECIALISTS**

Twenty-three (23) local public health agencies employ Epidemiology Specialists; all of them work full time. Twenty-seven percent (27%) earn an average annual salary in the range from \$30,000 to \$39,999, the rest earn over \$40,000. Seventy-nine percent (79%) of Epidemiology Specialists have successfully completed training on the Incident Command System. (See Graphs 7.15.1 thru 7.15.4 and Data Tables 7.15.1 thru 7.15.4)

## **EMERGENCY RESPONSE PLANNERS**

Thirty-four (34) agencies employ emergency response planners; 91% are employed full time. Ninety-four percent (94%) of the emergency response planners have successfully completed training on the Incident Command System. Emergency response planners mainly (73%) earn average annual salaries in the range from \$40,000 to \$54,999; 23% earn in the \$30,000 to \$39,999 range. (See Graphs 7.16.1 thru 7.16.4 and Data Tables 7.16.1 thru 7.16.4)

## **PHYSICIANS AND DENTISTS**

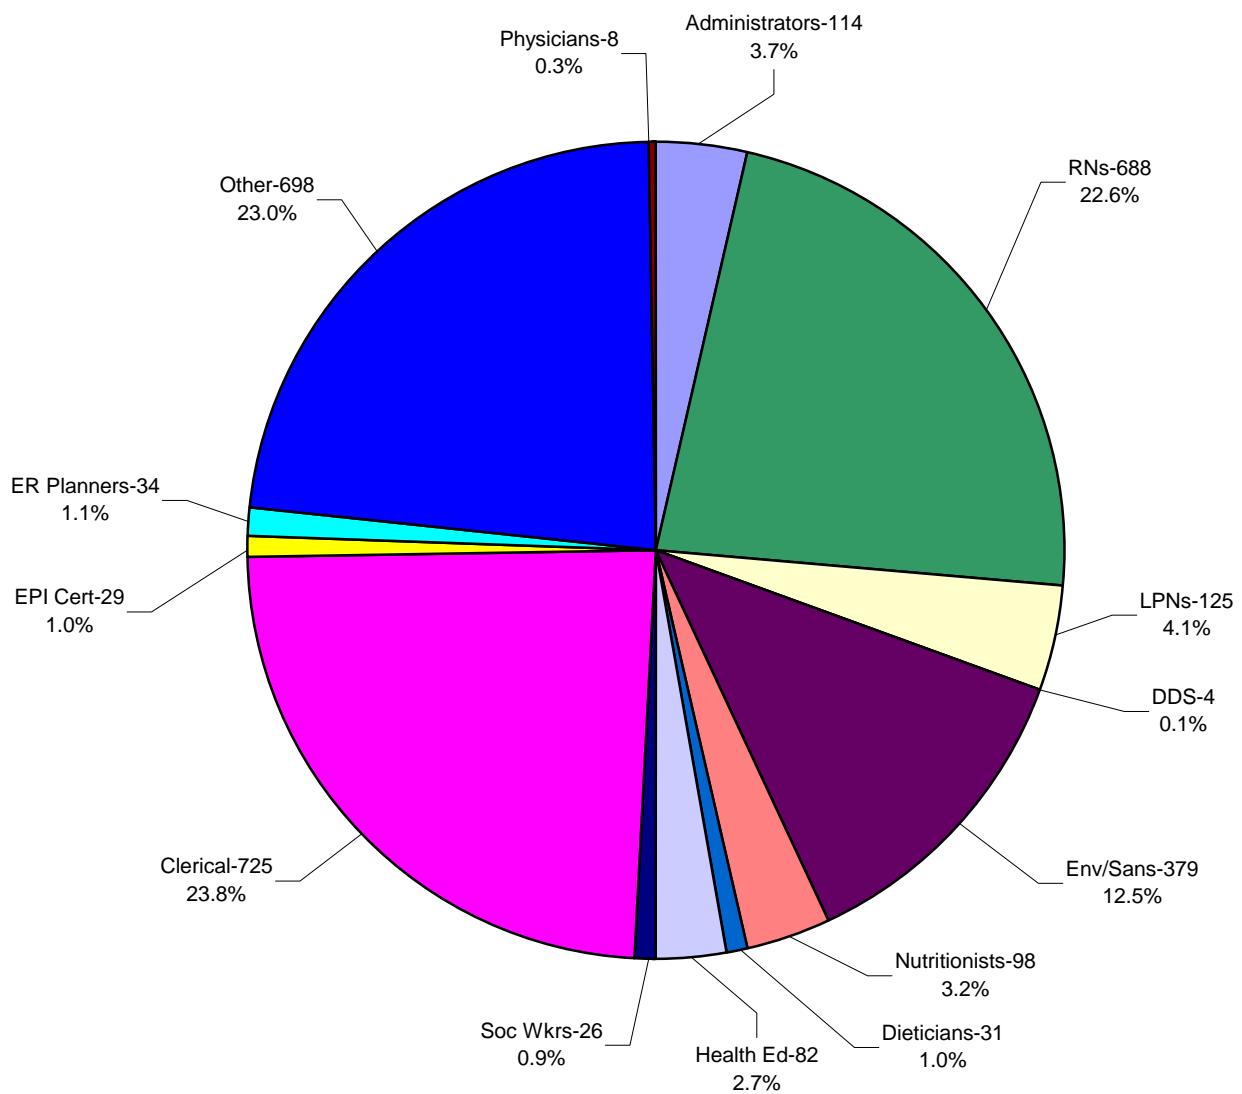

Fourteen (14) local public health agencies have a total of 18 physicians on staff. Only 2 of the 8 physicians works full time. An additional 153 physicians are available as consultants for local public health agencies. Forty-five percent (45%) work as volunteers.

Only 4 dentists are paid employees of local public health agencies, 3 of which work full time. An additional 27 dentists provide services for local public health agencies primarily (56%) as volunteers. (See Graph 7.17.1 & 7.17.2.3 and Data Tables 7.17.1 thru 7.17.2.3)

## **OTHER LOCAL PUBLIC HEALTH AGENCY STAFF**

Over half (65%) of local agencies employ staff in positions other than those described above. Other staff makes up 23% of local public health agency workforce. Various categories of other staff include animal control officers, homemaker aides, janitorial staff and information technologists. (See Graph 7.18.1 & 7.18.1.1 and Data Tables 7.18.1 & 7.18.1.1)

**Total Local Public Health Agencies  
Public Health Staff Percentages - 2005-2006**

## **CHAPTER 2**

### **II. VARIATION IN LOCAL PUBLIC HEALTH AGENCY WORKFORCE BY SIZE OF POPULATION SERVED - 2005**

Forty-four percent (44%) of Missouri's local public health agency workforce is employed in the 13 public health jurisdictions that serve populations greater than 80,000. The remaining 101 agencies employ the rest (56%). The largest agencies are most likely to employ staff in full-time positions. Ten percent (10%) of the largest agencies' staff works part time while 37% of the staff in the smallest agencies is employed part time. Agencies serving populations of 20,001-40,000 had a higher turnover rate, with 19% of their staff hired in the last year. Agencies serving other population sizes hired from 12% to 13% of their staff during the past year. (See Graph 7.1 & 7.2 and Data Table 7.1 & 7.2)

#### **BENEFITS FOR LOCAL PUBLIC HEALTH WORKFORCE**

Most agencies (85% of smallest to 100% of largest) contribute to health insurance benefits for staff. However, of agencies serving populations greater than 80,000, 77% also contribute to dental insurance coverage; only 15% of agencies serving populations 20,000 or fewer are able to do so. Ninety-two percent (92%) of the largest agencies contribute toward life insurance for their staff, while only 67% of the smallest agencies do so. Staff retirement programs are supported by 100% of agencies in both groups that serve populations greater than 40,000. Seventy-six percent (76%) of the smallest agencies contribute toward this benefit, and 77% of agencies that serve populations from 20,001 to 40,000 contribute toward employee retirement. (See Graph 7.3 & 7.4 and Data Tables 7.3 & 7.4)

#### **PROFESSIONAL DEVELOPMENT**

Most agencies (89% of the smallest to 100% of both groups that serve populations over 40,000) have staff that participate in computer based training, satellite education programs, and other continuing education. Agencies serving populations over 80,000 are more likely than those in other groups to have staff participating in college courses as a means of professional development; 69% of agencies in this group utilize college courses compared to 42% to 50% of agencies in groups that serve other sizes of population. (See Graph 7.5.2 and Data Table 7.5.2)

#### **ADMINISTRATORS**

Over half (55%) of administrators in agencies that serve populations 20,000 or fewer are registered nurses. Nurses also fill the role as administrator in 50% of agencies that serve populations from 40,001 to 80,000. No agencies that serve populations greater than 80,000 have nurses as their administrator. (See Data Table 7.6.1)

The percentage of time spent on administrative activities increases in agencies serving larger populations. Eleven of the 13 administrators (85%) in the largest agencies spend all of their time on administration. Ninety-four percent (94%) of administrators in agencies serving populations from 40,001 to 80,000, 50% of administrators in agencies serving populations from 20,001 to 40,000, and only 42% of administrators in agencies serving populations 20,000 or fewer spend all of their time managing people and activities within their organization. A smaller percentage (49%) of the administrators in agencies serving in the agencies serving less than 20,000 population have successfully completed training on the Incident Command System, while

in the other three population size categories, 70% to 94% of the administrators have successfully completed that training. (See Graphs 7.6.3 & 7.6.3.2 and Data Tables 7.6.3 & 7.6.3.2)

Educational levels of administrators are highest in the largest agencies. Eighty-five percent (85%) of administrators in agencies serving populations over 80,000 have a master's or doctorate degree. The percentage of administrators with a bachelor's degree or above decreases from 100% in agencies serving populations greater than 80,000, and 88% in agencies serving populations from 40,001 to 80,000, down to 56% in agencies serving populations 20,000 or fewer. Twenty-four percent (24%) of administrators in agencies serving populations 20,000 or fewer, and 27% of administrators in agencies serving populations from 20,001 to 40,000 have high school as their highest graduation level. Seven percent (7%) and 13% of administrators in these respective groups are currently working towards a baccalaureate degree. (See Graph 7.6.4 and Data Table 7.6.4 & 7.6.6)

Over half (54% to 64%) of all administrators have been in their position 6 years or more. Administrators in the largest agencies were hired more recently; 46% have spent 5 years or less in their position. (See Graph 7.6.5 and Data Table 7.6.5)

Annual salary earned by an administrator increases with the size of population served by the agency. A majority (85%) of administrators in agencies serving populations greater than 80,000, earn an annual salary of \$75,000 or more. In agencies that serve populations from 40,001 to 80,000, the majority of administrators (69%) earn from \$55,000 to \$74,999. More administrators (50%) in agencies serving populations from 20,001 to 40,000 and 55% in agencies that serve populations of 20,000 or fewer earn between \$40,000 and \$54,999. (See Graph 7.6.7 and Data Table 7.6.7).

## NURSES

Registered nurses (RNs) make up approximately 26% of the total staff in agencies within the 3 groups that serve smaller sizes of population, but in agencies that serve populations greater than 80,000, RNs represent only 18% of their workforce. The agencies servicing larger populations are more likely to employ Advanced Practice RNs. Of the 55 Advanced Practice Registered Nurses, 40 are employed in agencies serving 40,000 or more. (See Graphs 7.7.1.1 thru 7.7.1.3 and Data Tables 7.7.1.1 thru 7.7.1.3)

There are 24 RNs that are certified by American Nurses Credential Center (ANCC) as Community Health Nurses currently working in local public health agencies. These are evenly distributed among agencies that serve populations up to 40,000 and those serving populations greater than 80,000. Only two certified nurses work in agencies serving populations between 40,001 and 80,000. (See Graph 7.7.3 thru 7.7.6 and Data Table 7.7.4)

A larger percentage (69% to 78%) of RNs working in the 3 groups of agencies that serve smaller sizes of population reportedly are practicing population-based public health nursing. Fifty-four percent (54%) of RNs working in the group of agencies serving populations over 80,000 report that they practice population-based public health nursing. A larger percentage (46%) of RNs working in agencies serving populations over 80,000 have successfully completed training on the Incident Command System, while only 17% to 25% of agencies serving populations in the other three size categories have successfully completed that training. (See Graphs 7.7.3 thru 7.7.6 and Data Tables 7.7.5 & 7.7.6)

Sixty-nine percent (69%) of agencies that serve populations greater than 80,000 pay their full-time registered nurses an average annual salary of \$40,000 or more; only 8% of agencies that serve populations of 20,000 or fewer pay nurses in this range. The largest percentage (62% to 84%) of agencies in all population groups under 80,000 pay nurses an average annual salary in the range between \$30,000 and \$39,999. No agency in the group serving the largest population size pays nurses an average annual salary less than \$30,000. However, 6% to 21% of agencies in the groups serving smaller population sizes pay nurses an average annual salary in the lowest range between \$20,000 and \$29,999. (See Graph 7.7.7 and Data Table 7.7.7)

Sixty-seven percent (67%) of agencies that serve populations greater than 80,000 pay Licensed Practical Nurses (LPNs) an annual average salary within the range between \$30,000 and \$39,999, however, the majority of agencies (88% or more) in other groups pay LPNs in a lower range between \$20,000 and \$29,999. LPNs represent 4% of the workforce in the smallest agencies, but only 1% of the workforce in the largest agencies. (See Graphs & 7.8.2 and Data Tables 7.8.1.1 & 7.8.2)

## ENVIRONMENTAL SPECIALISTS

More agencies (59%) serving populations of 20,000 or fewer employ environmental specialists part time; in agencies serving populations 40,001-88,000, only 5% of the environmental specialists work part time. Twenty-nine percent (29%) to 33% of agencies that serve populations of 80,000 or fewer pay environmental specialists an average annual salary in the range between \$20,000 and \$29,999. The majority of agencies (61% to 91%) in all groups pay environmental specialists an average annual salary above \$30,000, and 33% of the largest agencies pay in a higher range from \$40,000 to \$54,999. (See Graphs 7.9.1.1 & 7.9.4 and Data Tables 7.9.1 & 7.9.4)

Sixty-three percent (63%) of environmental specialists working in the group of agencies serving populations over 80,000 have successfully completed training on the Incident Command System, compared to 26% to 37% in the other three groups of agencies. Fifty-one percent (51%) of environmental specialists working in the group of agencies that serve population sizes between 20,001 and 40,000 are state certified; only 10% of those working in the largest agencies are certified. Nationally registered environmental specialists range from 2% to 10% among the 4 groups of agencies. (See Graphs 7.9.3 and 7.9.5 and Data Tables 7.9.3 thru 7.9.5.2)

## NUTRITIONISTS

Agencies serving populations of 20,000 or fewer are most likely to hire nutritionists as part-time staff. Seventy-nine percent (66%) of nutritionists in agencies serving populations of 20,000 or fewer work part time compared to approximately 20% in each of the 2 groups of agencies serving populations greater than 40,000. Half (50%) of full time nutritionists working in the smallest agencies earn an average annual salary in the range from \$20,000 to \$29,999. Eighty-eight percent (88%) of full-time nutritionists in the largest agencies and 60% of those working in agencies that serve populations from 40,001 to 80,000 earn an annual salary in a higher range of \$30,000 or more. (See Graphs 7.10.1.1 & 7.10.3 and Data Tables 7.10.1.1 & 7.10.3)

## DIETICIANS

Eighty percent (80%) of dieticians working in the largest agencies work in full-time positions. Only eighteen percent (18%) of those working in agencies serving populations of 20,000 or fewer work full-time; while 67% of those working in agencies that serve populations between 20,001 and 40,000 work full time. All dieticians in agencies that serve populations above 20,000 are registered dieticians. Eighty-two percent (82%) of dieticians in the smallest agencies are registered. The majority (67% to 100%) of agencies in each group pay dieticians an average annual salary in the range between \$30,000 and \$39,999. (See Graphs 7.11.1.1 thru 7.11.4 and Data Tables 7.11.1.1 thru 7.11.4)

## HEALTH EDUCATORS

Seventy-seven percent (77%) of the largest agencies have health educators; however, only 40% of agencies that serve populations of 20,000 or fewer have a health educator on staff. Eighty-nine percent (89%) of health educators in the largest agencies work full time, compared to the smallest agencies where only 55% are full time. Over half (60%) of the largest agencies pay full-time health educators an average annual salary over \$40,000. More than half (56%) of agencies in group serving populations up to 20,000 pay health educators in the lowest range between \$20,000 and \$29,999. Half of the 10 health educators that are Certified Health Education Specialists work in the largest agencies. (See Graphs 7.12.1 thru 7.12.4 and Data Tables 7.12.1 thru 7.12.4)

## SOCIAL WORKERS

Almost half (46%) of agencies that serve populations greater than 80,000 hire social workers, but only 7% of the smallest agencies have them. Thirty-six percent (36%) to 100% of social workers in the 3 groups of agencies that serve populations over 20,001 are licensed, while 20% in the smallest agencies are. (See Graphs 7.13.1 & 7.13.4 and Data Tables 7.13.1 & 7.13.4)

## SUPPORT STAFF

Support staff account for 30% of total workforce in agencies that serve populations between 20,001 and 40,000, and also 30% of total workforce in agencies that serve populations between 40,001 and 80,000. Only 21% of workforce in the largest agencies is comprised of support staff. Twenty-three percent (23%) of the support staff in the largest agencies have successfully completed training on the Incident Command System, compared to 10% to 13% of support staff in the other three groups of agencies who have successfully completed that training. As with most other categories of staff, more agencies that serve populations greater than 80,000 pay support staff an average annual salary in a higher range. Seventy-seven percent (77%) of the largest agencies pay in the range between \$20,000 and \$29,999 and 15% of them pay over \$30,000. Between 27% and 40% of agencies in the other 3 groups of agencies pay support staff in the lowest range below \$20,000. (See Graph 7.14.1.1. thru 7.14.4 and Data Table 7.14.1.1 thru 7.14.4)

## EPIDEMIOLOGY SPECIALISTS

One hundred percent (100%) of the largest agencies have epidemiology specialists on staff, but only 5% of the smallest agencies employ them. All of the epidemiology specialists in the agencies serving populations up to 20,000 have successfully completed training on the Incident Command System, with other sizes reporting that from 67% to 80% of the epidemiology specialists have completed that training. (See Graphs 7.15.1 & 7.15.3 and Data Tables 7.15.1 & 7.15.3)

## **EMERGENCY RESPONSE PLANNERS**

Each of the 13 largest agencies has an emergency response planner on staff; only 9% of the smallest agencies employ planners. In the 2 groups of agencies that serve populations over 40,001, each of the planners works full time. In the 2 groups of agencies that serve populations up to 40,000, 60% to 83% of planners work full time. All of the emergency response planners in the agencies serving population sizes of 20,001-40,000 and those serving 80,001 have successfully completed training on the Incident Command System. Eighty percent (80%) of the emergency response planners in the smallest agencies, and 89% of emergency response planners in the agencies serving populations of 40,001-80,000 have successfully completed training on the Incident Command System. (See Graphs 7.16.1 & 7.16.3 and Data Tables 7.16.1 & 7.16.3)

## **PHYSICIANS**

Only two full time physicians are employed in local public health agencies. Each of them works in an agency serving populations greater than 80,000. Six part-time physicians are employed and are distributed among the agencies serving 20,000 or more. Eighty percent (80%) of the agencies serving populations over 80,000 have physicians on retainer. Forty-five percent (45%) of the smallest agencies rely on volunteer physicians. (See Graph 7.17.1 thru 7.17.1.3 and Data Table 7.17.1.1 & 7.17.1.3)

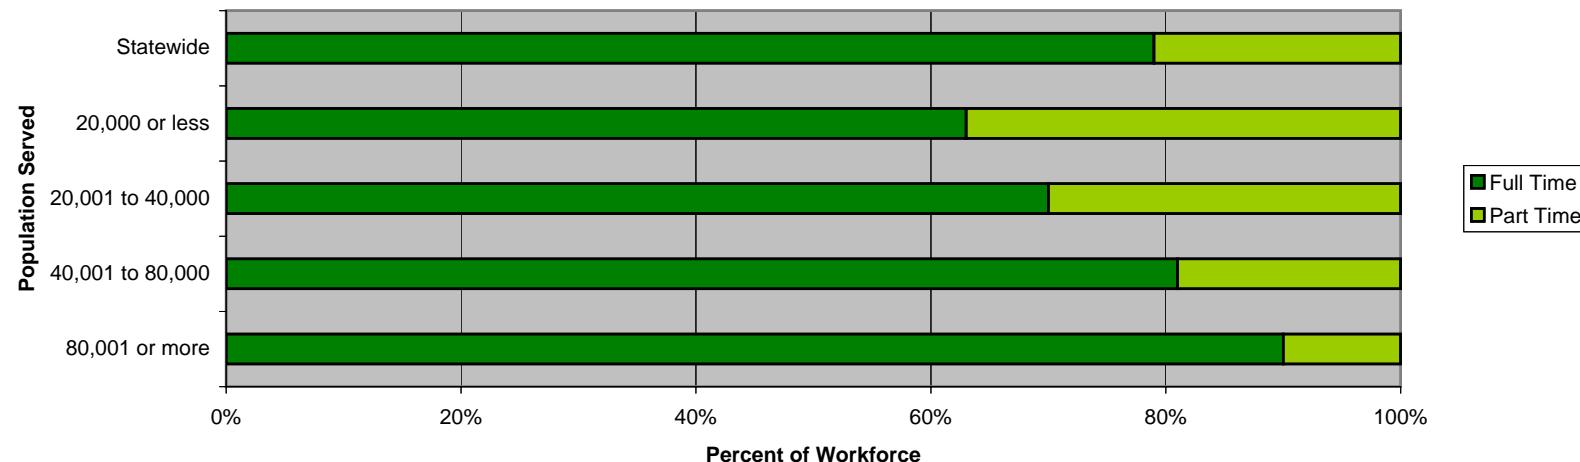

## **DENTISTS**

Only 4 agencies employ dentists to work in public health. Three are full-time dentists who work in agencies that serve populations greater than 80,000. One part-time dentist works in an agency that serves a population between 20,001 and 40,000. The largest agencies have an additional 11 dentists on retainer. The smallest agencies, and those that service populations between 40,001 and 80,000 rely on volunteer dentists. (See Graph 7.17.2 thru 7.17.2.3 and Data Table 7.17.2 thru 7.17.2.3)

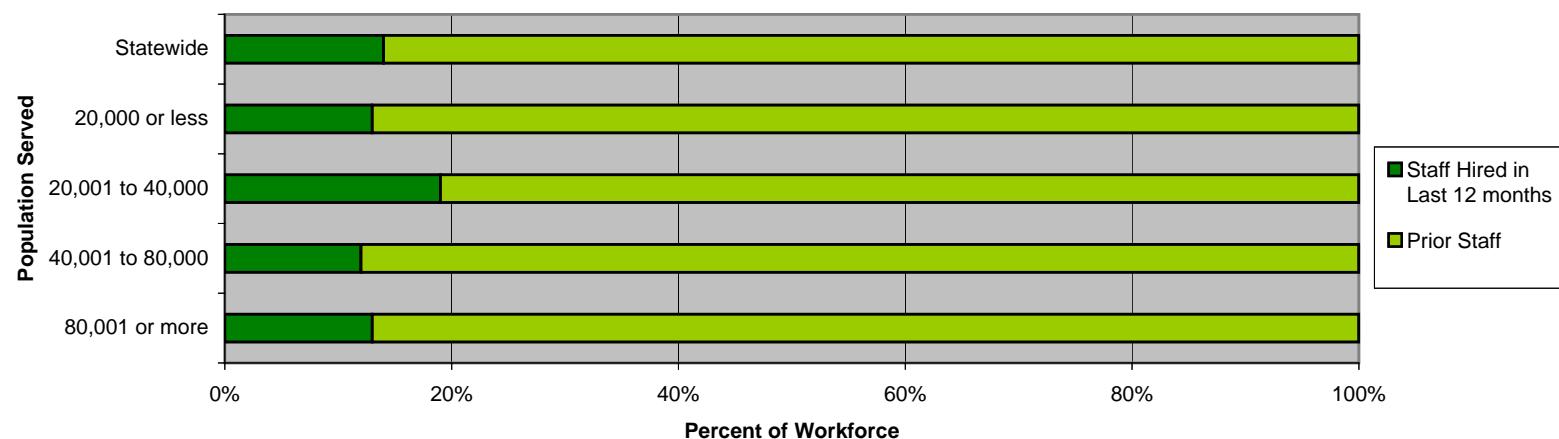

## **OTHER LOCAL PUBLIC HEALTH AGENCY STAFF**

Agencies serving populations greater than 80,000 reportedly have up to 31% of their workforce filling positions other than those described above, compared to agencies serving populations from 40,001 to 80,000 where only 11% of staff fill other kinds of positions. Fifty-nine percent (59%) of the 698 staff reported in the “other” category work in the largest agencies. (See Graph 7.18.1.1 & Data Table 7.18.1.1)

## **CHAPTER 3**

### **I. SUMMARY OF SERVICES AND PROGRAMS - 2005**

Clinical Services: ninety-nine percent (99%) local public health agencies in Missouri offer immunizations including childhood immunization and 98% offer influenza and pneumonia vaccinations. Nearly all have standing orders for immunizations. Ninety percent (90%) of agencies offer WIC services. A majority of agencies (56%) provided family planning services during the preceding year. Forty-four percent (44%) of agencies provide breast and cervical cancer screening; and approximately 25% of agencies provide well child exams for non-Medicaid children, HCY exams for children covered by Medicaid, and prenatal care. A few local agencies (9%) offer dental sealants, and 11% offer other dental health services. A few agencies (10%) also offer primary care that meets the definition “sick and well care for people of all ages.” (See Graphs 5.1 thru 5.1.7.1 and Data Tables 5.1.7.1)

Screening and Testing: ninety-seven 97% of local public health agencies test for tuberculosis. Screening or testing for hypertension, elevated blood lead, HIV, and pregnancy is performed by 90% or more of agencies. Over 80% of agencies screen for diabetes and sexually transmitted diseases. Screening for cholesterol is offered by over 75% of agencies, and over 60% offer vision and hearing screenings and 58% conduct screenings for schools. (See Graphs 5.2 and Data Tables 5.2)

Other Services and Programs: environmental health services are reportedly provided by 113 of the 114 local public health agencies. Ninety percent (90%) or more of agencies inspect childcare facilities, refer women for prenatal care, and offer assistance for people with disability or language barriers to access care. Eighty percent (80%) or more of agencies issue Temporary Medicaid Cards for eligible pregnant women, provide nursing consultation in childcare facilities, assist clients with MC+ applications, and provide nutritional counseling. Other programs and services offered by over half of agencies (54% to 74%) include case management of children with elevated lead levels, prenatal case management, tobacco use prevention programs, women’s health programs, and cancer screening and prevention education. A number of agencies (40% to 50%) provide home visits for newborn infants, distribute child safety seats, and conduct prevention and management activities for diabetes and cardiovascular disease.

Home health services are provided by 39 agencies (34%), the same number of agencies that provided home health in 2004. (See Graphs 5.3 and Data Tables 5.3)

## CHAPTER 3

### II. VARIATION IN SERVICES AND PROGRAMS BY SIZE OF POPULATION SERVED - 2005

**Clinical Services:** agencies serving populations greater than 80,000 were less likely to offer family planning and WIC services than agencies serving smaller populations. Only 31% of agencies serving populations greater than 80,000 offered family planning services compared to 58% or more of agencies in each of the groups that serve populations less than 80,000. Over 90% of agencies in groups that serve populations less than 80,000 provide WIC services, while only 62% of the largest agencies do so.

Agencies that serve populations between 20,001 and 40,000 are most likely (30%) to provide prenatal care; 13% to 18% of agencies in groups that serve other populations sizes offer prenatal care services.

Twenty-five percent (25%) of agencies serving populations of 40,001 80,000 provide dental sealants, while only 4% to 15% of agencies in groups that serve other populations offer this service. (See Graphs 5.1 and Data Tables 5.1)

**Screening and Testing:** agencies that serve larger populations are less likely to offer a number of different screenings than agencies serving smaller populations. The percentage of agencies screening for hearing problems, Tuberculosis, pregnancy, HIV and diabetes is lowest for agencies serving populations greater than 80,000.

Eighty-four percent (84%) of agencies that serve populations 20,000 or fewer, and 83% of agencies that serve populations from 20,001 to 40,000 provide cholesterol screening compared to 50% of agencies that serve populations from 40,001 to 80,000, and only 54% of agencies that serve populations over 80,000.

Ninety-four percent (94%) of agencies in the group that serves populations between 40,001 and 80,000 and 98% of agencies in the group that serves populations fewer than 20,000 provide lead screening, compared to 77% of agencies that serve populations over 80,000 and 90% of agencies that serving populations between 20,001 and 40,000.

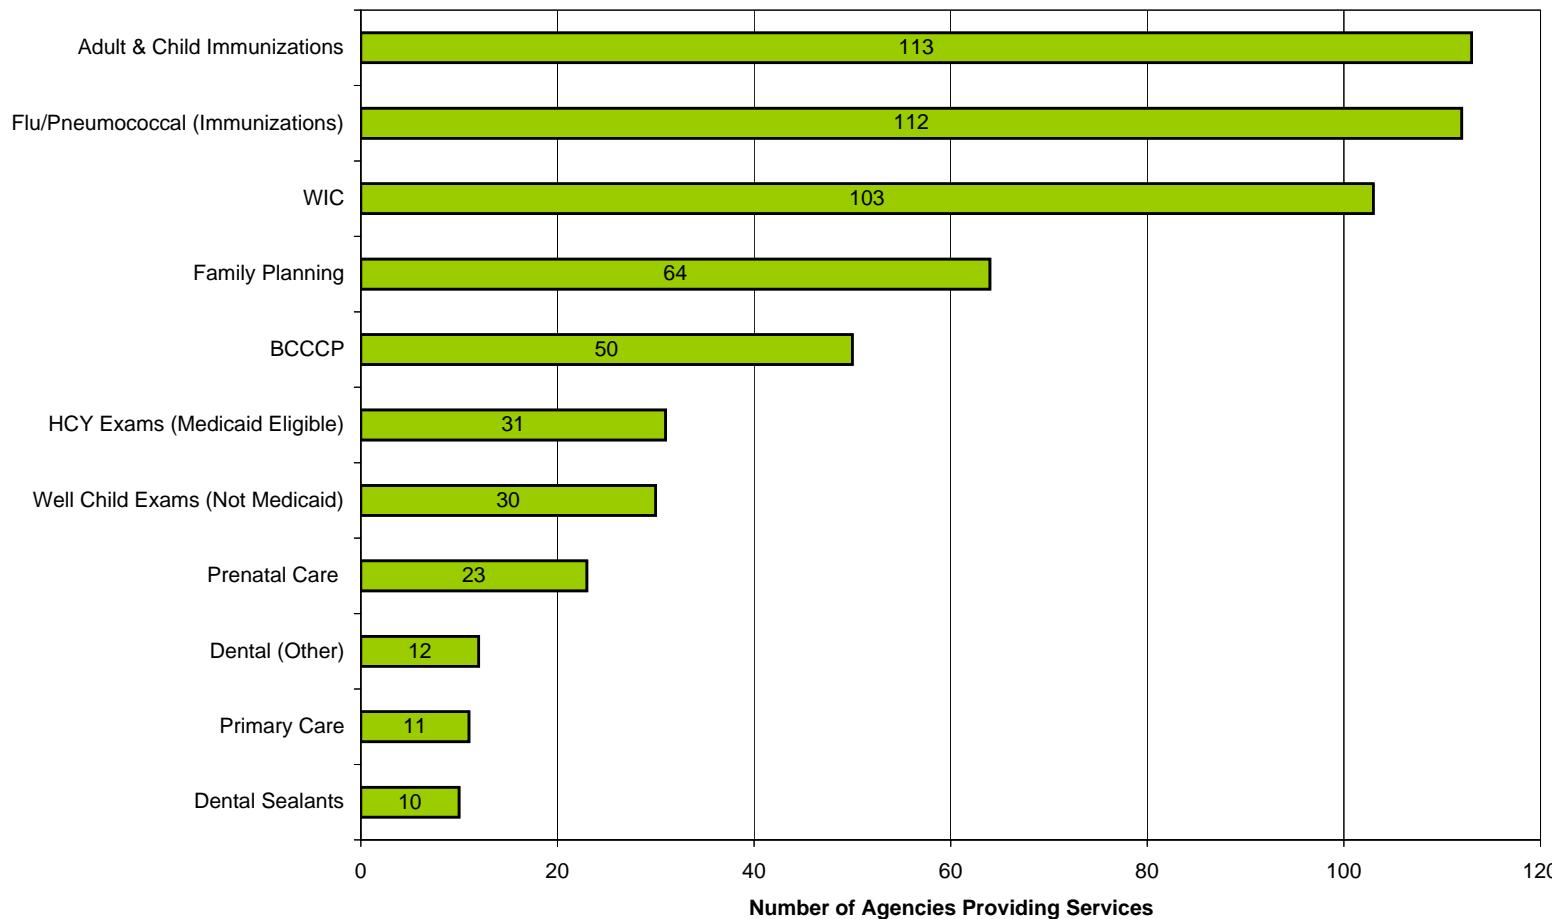

Agencies that serve populations between 40,001 and 80,000 are less likely to provide school health services than agencies in groups that serve other population sizes. (See Graphs 5.2 and Data Tables 5.2)

**Other Services and Programs:** home health programs are most likely to be offered by agencies serving smaller population sizes. Almost half (47%) of agencies serving populations 20,000 or fewer offer home health services, compared to 33% of those serving populations from 20,001 to 40,000, 19% of agencies serving populations from 40,001 to 80,000; none of the agencies serving populations over 80,000 offer home health services.

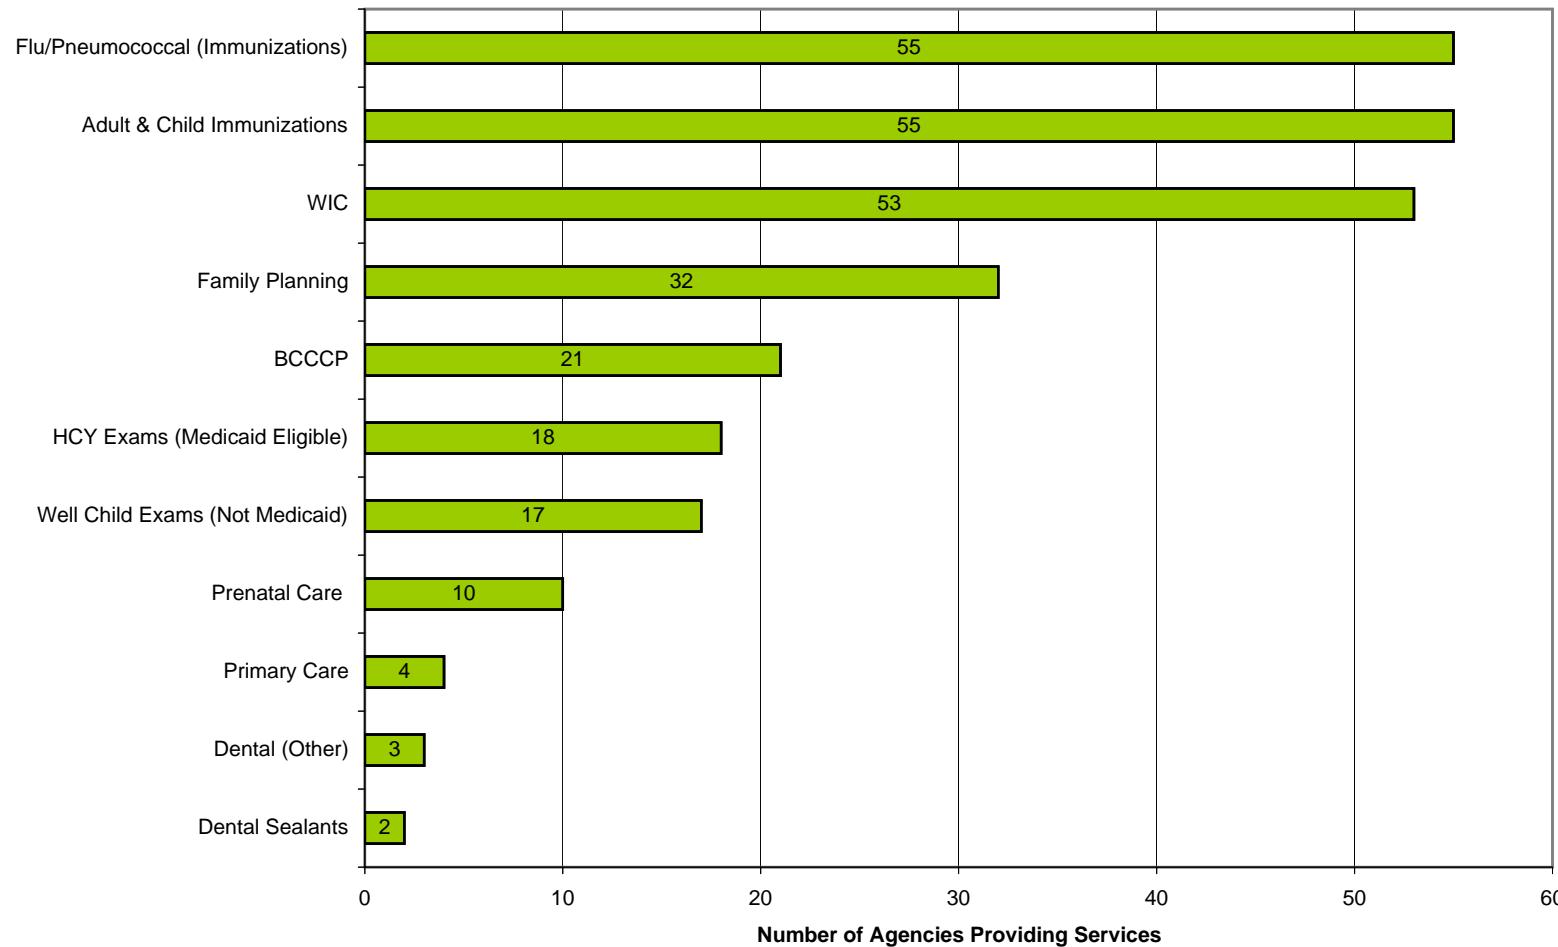

A higher percentage of the agencies in the group that serves populations between 40,001 and 80,000 offer newborn home visits. Sixty-nine percent (69%) of agencies in the group that serves populations between 40,001 and 80,000 provide a car seat program compared to 31% to 47% of agencies in groups that serve other sizes of population. The largest agencies are less likely to provide TEMP Medicaid cards for pregnant women; 62% provide this service compared to over 90% of agencies in each of the groups that serve smaller population sizes.

Other services and programs including child care facility inspections, nurse consultation to childcare providers, prenatal case management, nutritional counseling, MC+ applications, and chronic disease prevention and education programs are provided fairly consistently regardless of agency size. (See Graphs 5.3 and Data Tables 5.3)

Elevated Blood Level Case Management	11	85%

## **CHAPTER 4**

### **I. SUMMARY OF STATEWIDE FINDINGS RELATED TO LOCAL PUBLIC HEALTH AGENCY GOVERNING BODIES - 2005**

The majority of Missouri's local public health agencies are governed by Boards of Trustees. Sixteen percent (16%) are governed by County Commissions, and a few agencies are governed by other types of governance (i.e., City Council, etc.). (See Graph 9.1 and Data Table 9.1)

Less than half (36%) of the agencies use a Checklist to orient new governing body members. Eighty-two percent (82%) provide new governing body members with a copy of Public Health Works, or information on Internet access to Public Health Works. (Note: Public Health Works is a web-based Orientation Manual for Public Health Leaders, made available by the Center for Local Public Health Services and located at <http://www.dhss.mo.gov/LPHA/PHWorks/PublicHealthWorks.pdf>. The Center also provides orientation packets for governing body members upon request.) (See Graphs 9.2 & 9.3 and Data Tables 9.2 & 9.3)

Agencies provide printed information, verbal, or other presentations to new governing body members on various subjects pertinent to public health. Eighty-eight percent (88%) or more agencies orient new members on the Sunshine law, their agency policy manuals, and an overview of their agency's programs and goals. Seventy-nine percent (79%) provide other additional information on roles and responsibilities. Fifty-one percent (51%) of the agencies introduce the Public Health Makes Life Better video, 46% use the Principles of Public Health course and provide information on NALBOH (National Association of Local Boards of Health), 13% use the Introduction to Epidemiology as a resource, but only 4% introduce the Ten Essential Public Health Services to new governing body members. (See Graph 9.4 and Data Table 9.4)

## CHAPTER 4

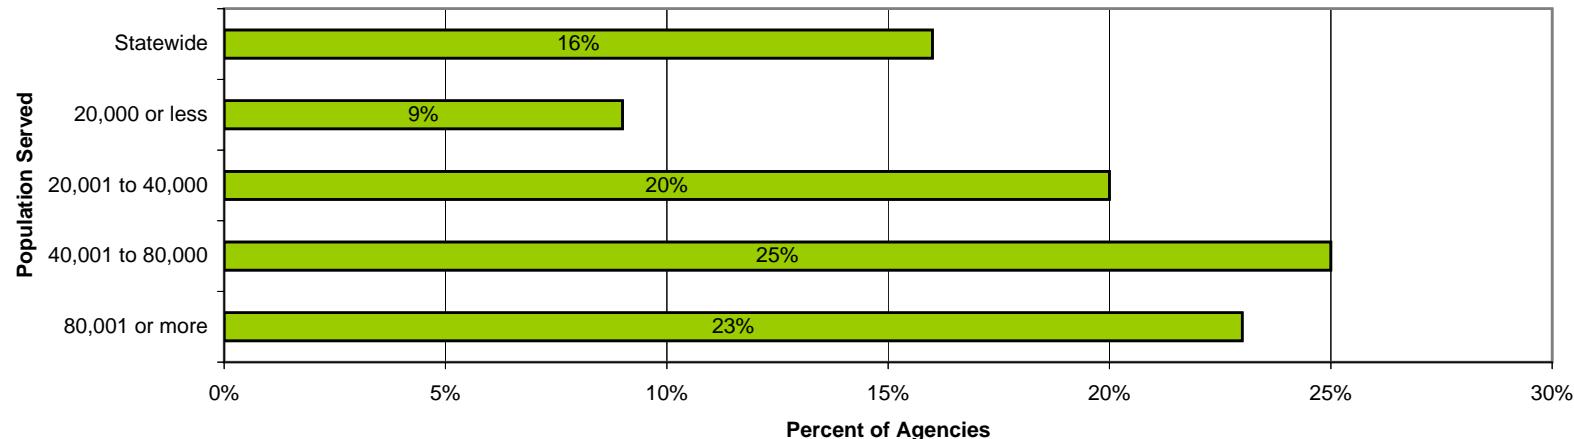

### II. VARIATION IN ACTIVITIES RELATED TO GOVERNING BODIES BY SIZE OF POPULATION SERVED - 2005

**Type of Governance:** Only 9% of the agencies serving populations up to 20,000 are governed by County Commissions. Twenty to twenty-five percent (20%-25%) of the agencies that serve populations over 20,001 are governed by County Commissions. (See Graph 9.1 and Data Table 9.1)

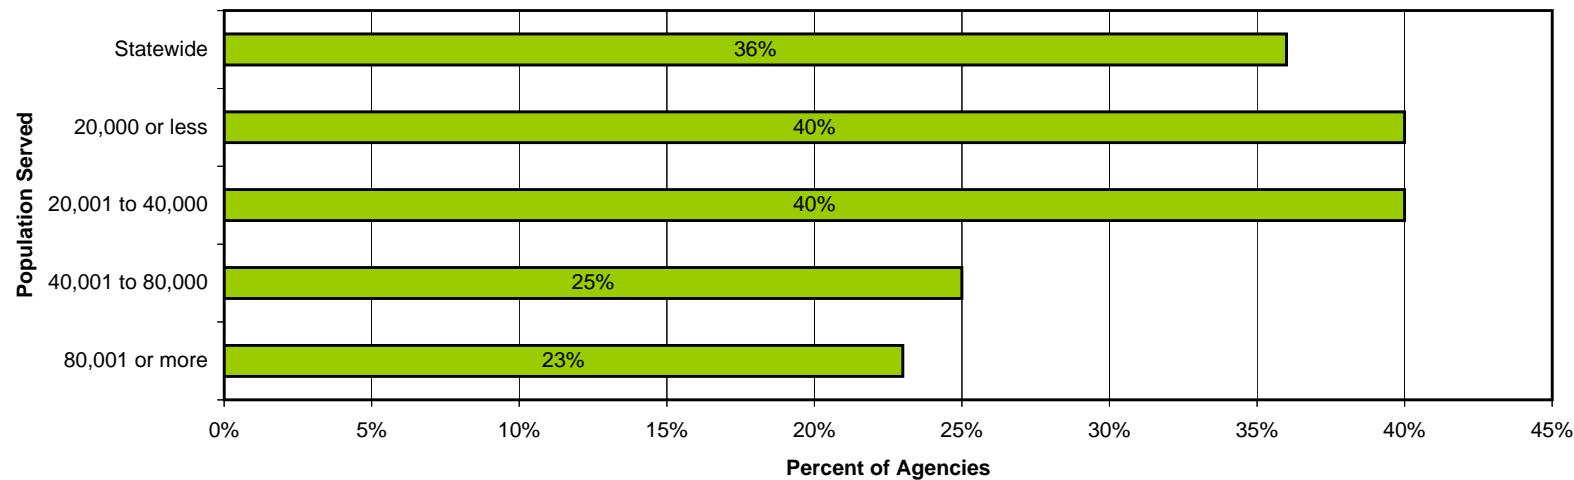

**Orientation:** forty percent (40%) of the agencies serving populations up to 40,000 use a checklist to orient new governing body members, while 25% or less of the larger agencies do so. Eight-three to eighty-nine percent (83%-89%) of agencies serving populations up to 80,000 provide new governing body members with a copy or information on Internet access to the Public Health Works, Orientation Manual for Public Health Leaders. However, only 46% of the largest agencies, those serving over 80,000, use this resource. (See Graphs 9.2 & 9.3 and Data Tables 9.2 & 9.3)

**Resource Utilization:** Overall, the smaller agencies are more likely to provide printed information, verbal, or other presentations to orient new governing body members. **Agency policy manuals** are provided to governing body members by 96% of the agencies serving populations of 20,000 or less, 97% of the agencies serving populations of 20,001-40,000, 88% of agencies serving populations of 40,001-80,000, but only 31% of the largest agencies serving over 80,000 populations. **Sunshine Law** information is provided by 93%-96% of the agencies serving populations of less than 40,000, while 75% and 54% of the agencies in the two larger categories provide that information. An **overview of the agency's programs and goals** is provided by 88% to 93% of the agencies serving populations of less than 80,000, while 77% of the largest size agencies (over 80,000 population) provide that information. **Other information on the roles and responsibilities** of governing body members is provided by 82%-88% of the agencies in three size categories serving populations up to 80,000, while only 38% of the largest agencies (over 80,000 population) provide that information. **The Public Health Makes Life Better video** is used by 50%-60% of the agencies in three size categories serving populations up to 80,000, while only 15% of the largest agencies provide that information. **Information on NALBOH** is presented to governing body members by 50%-53% of the agencies in two size categories serving populations up to 40,000, while only 31% and 23% of the two size categories serving populations over 40,000 present that information. 45%-56% of the agencies in three size categories serving populations up to 80,000 use the **Principles of Public Health** to orient new governing body members, while only 23% of the largest agencies provide that information. **Introduction to Epidemiology** is only presented to new governing body members by a small number of agencies, ranging from 8% to 19%, with the largest size agencies having the lowest percentage. Information regarding the **Ten Essential Public Health Services** is minimally used throughout the state, from no agencies serving populations of 20,001-80,000, to 5% of the agencies serving populations up to 20,000, and 8% of the largest agencies (over 80,001) providing that information. (See Graph 9.4 and Data Table 9.4)

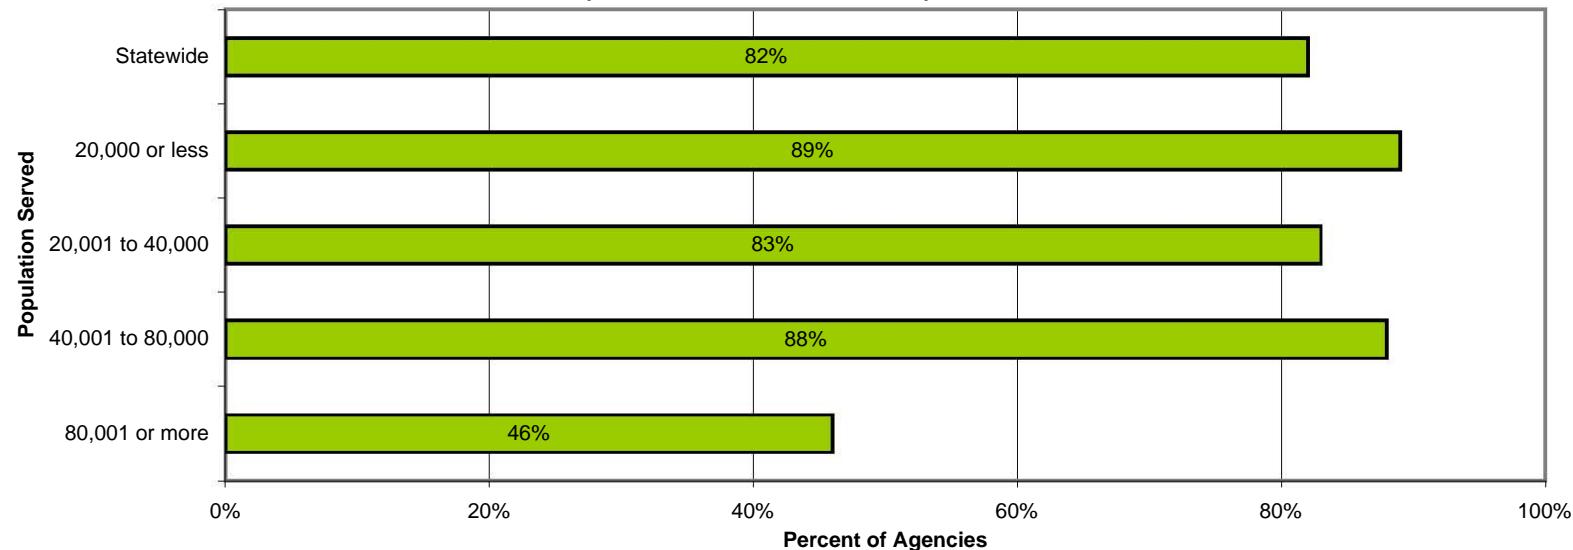

### **Agency is Governed by County Commission - 9.1**

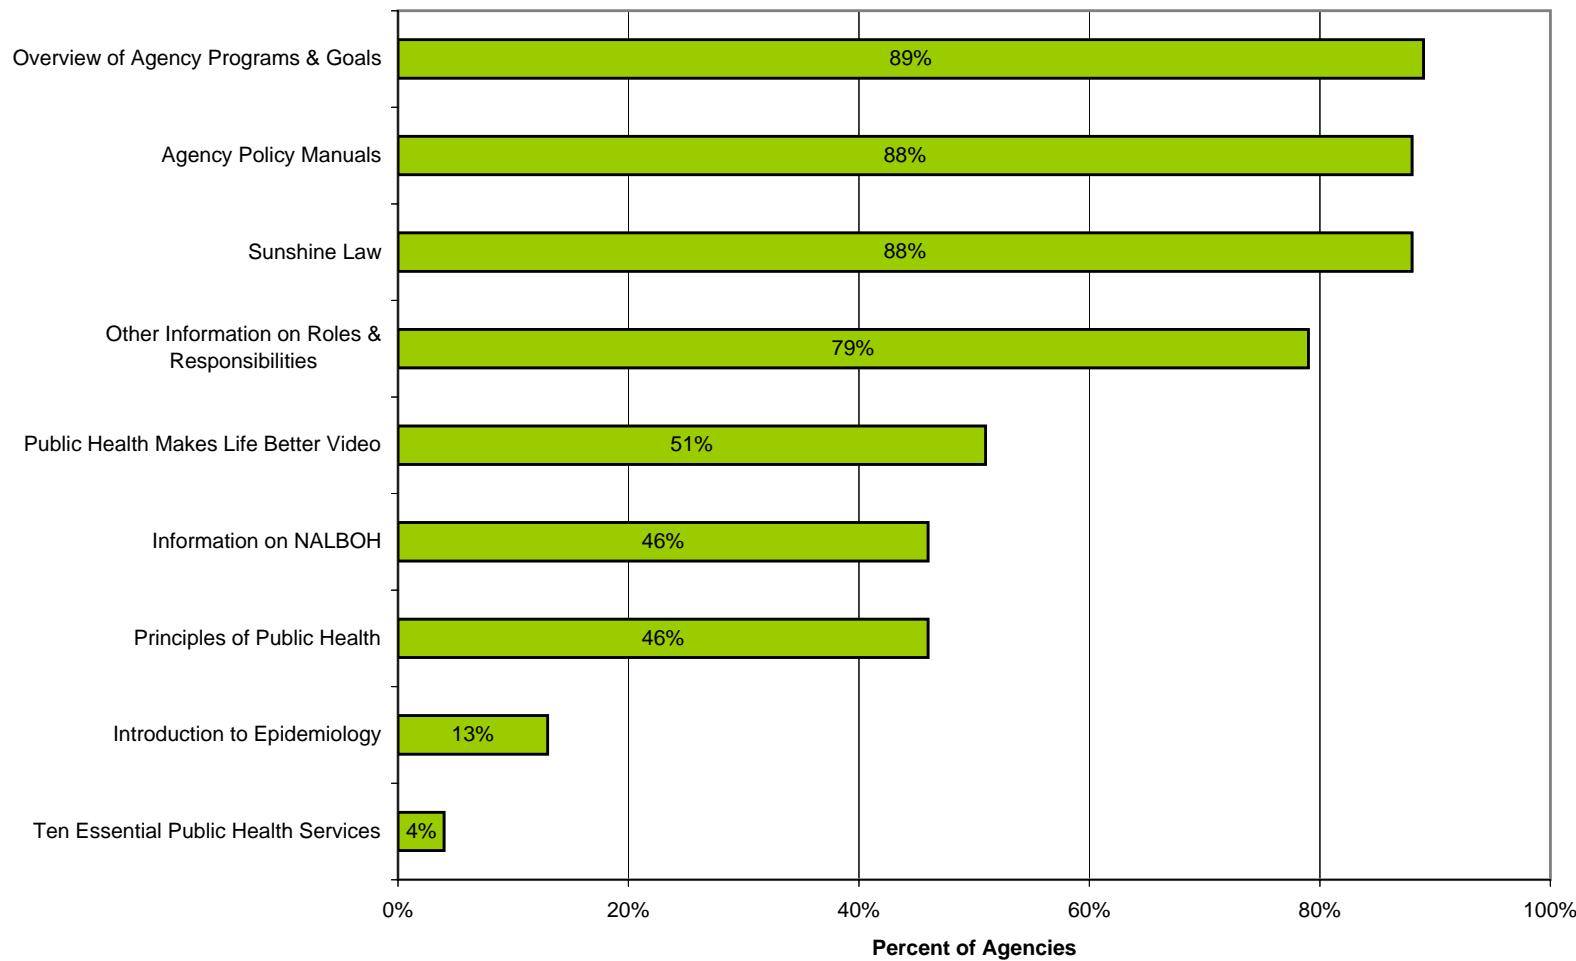

### **Agency has an Orientation Checklist to Orient New Governing Body Members - 9.2**

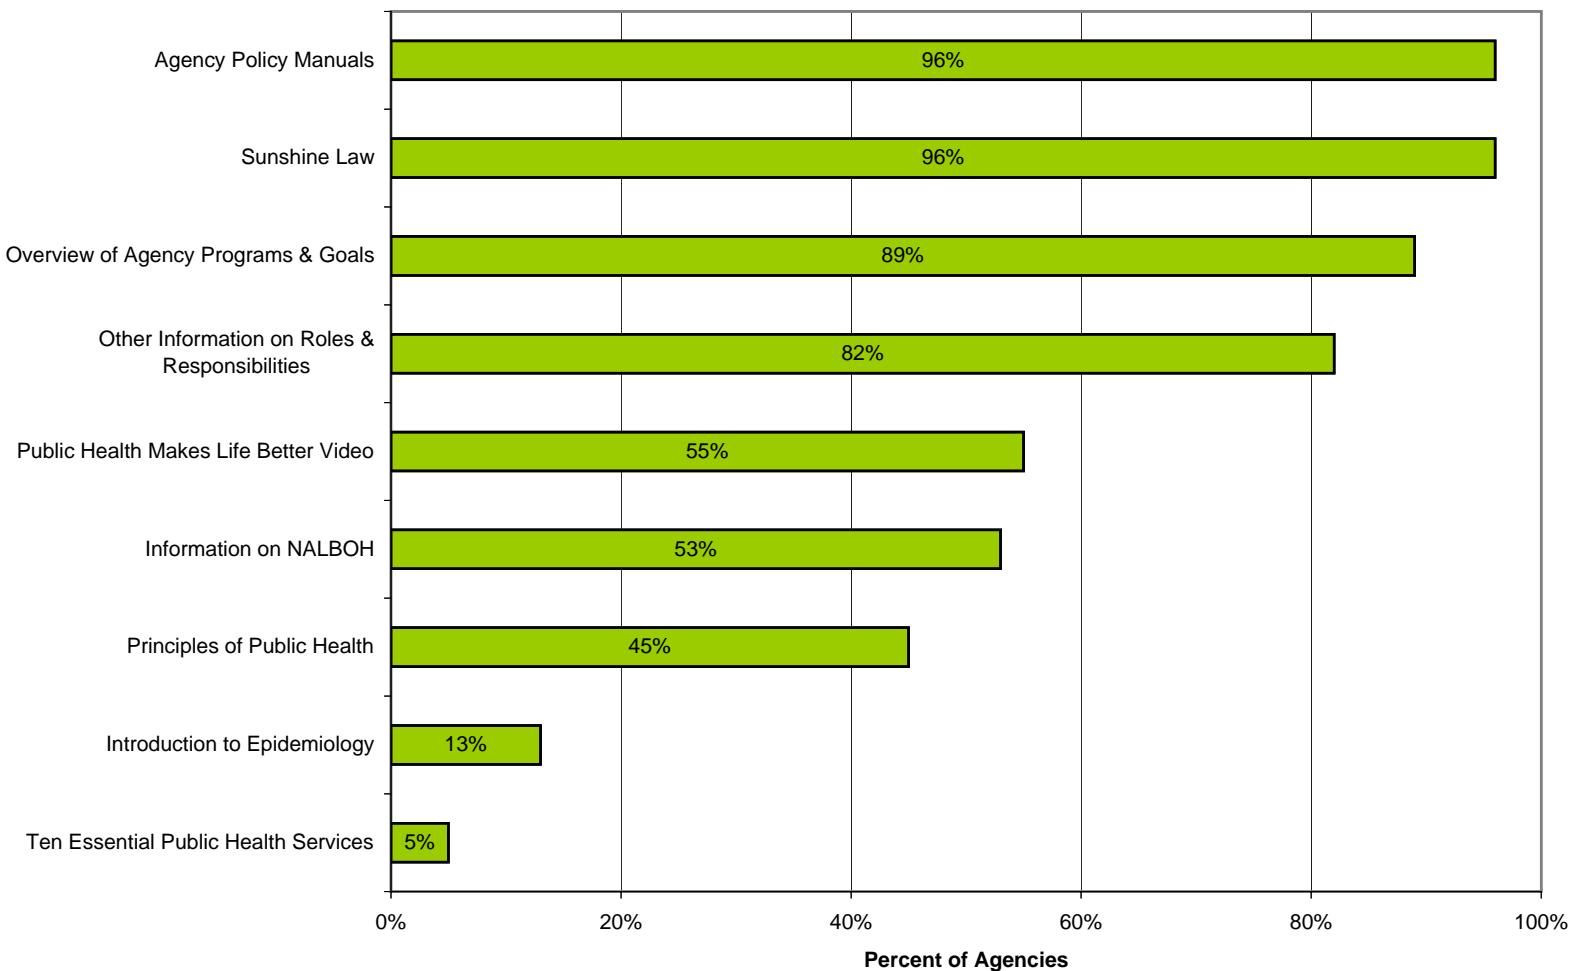

**Agency Provides New Governing Body Members With Public Health Works  
(Printed or Internet Access) - 9.3**

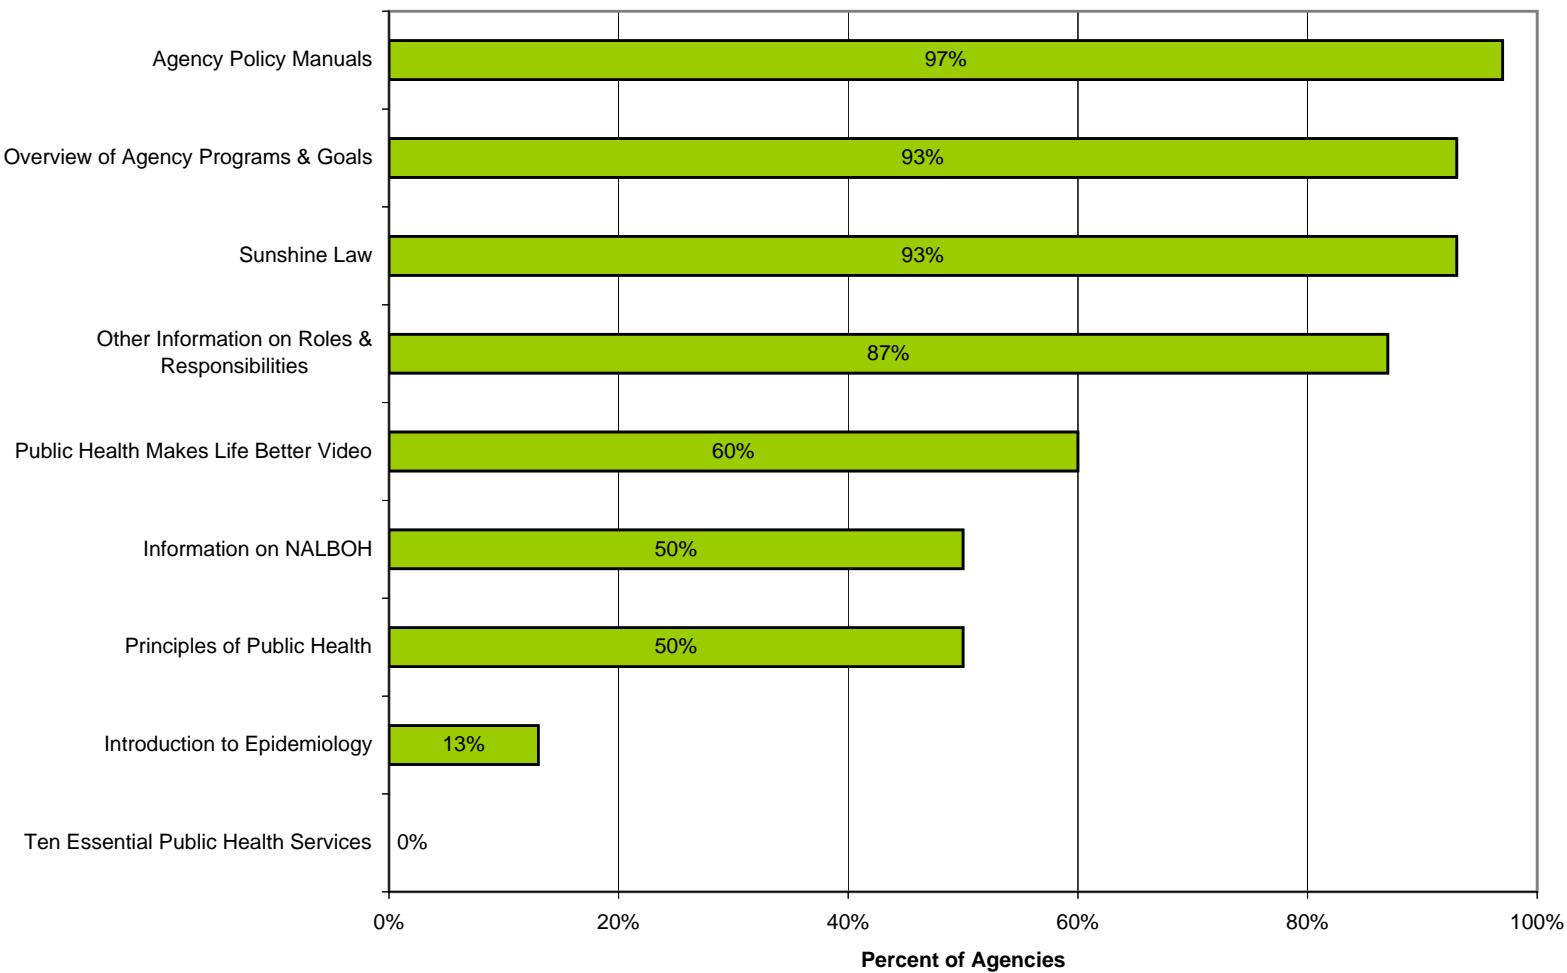

**Agency Provides Printed Information, Verbal, or Other Presentations on the Following - 9.4  
Statewide (114 Agencies)**

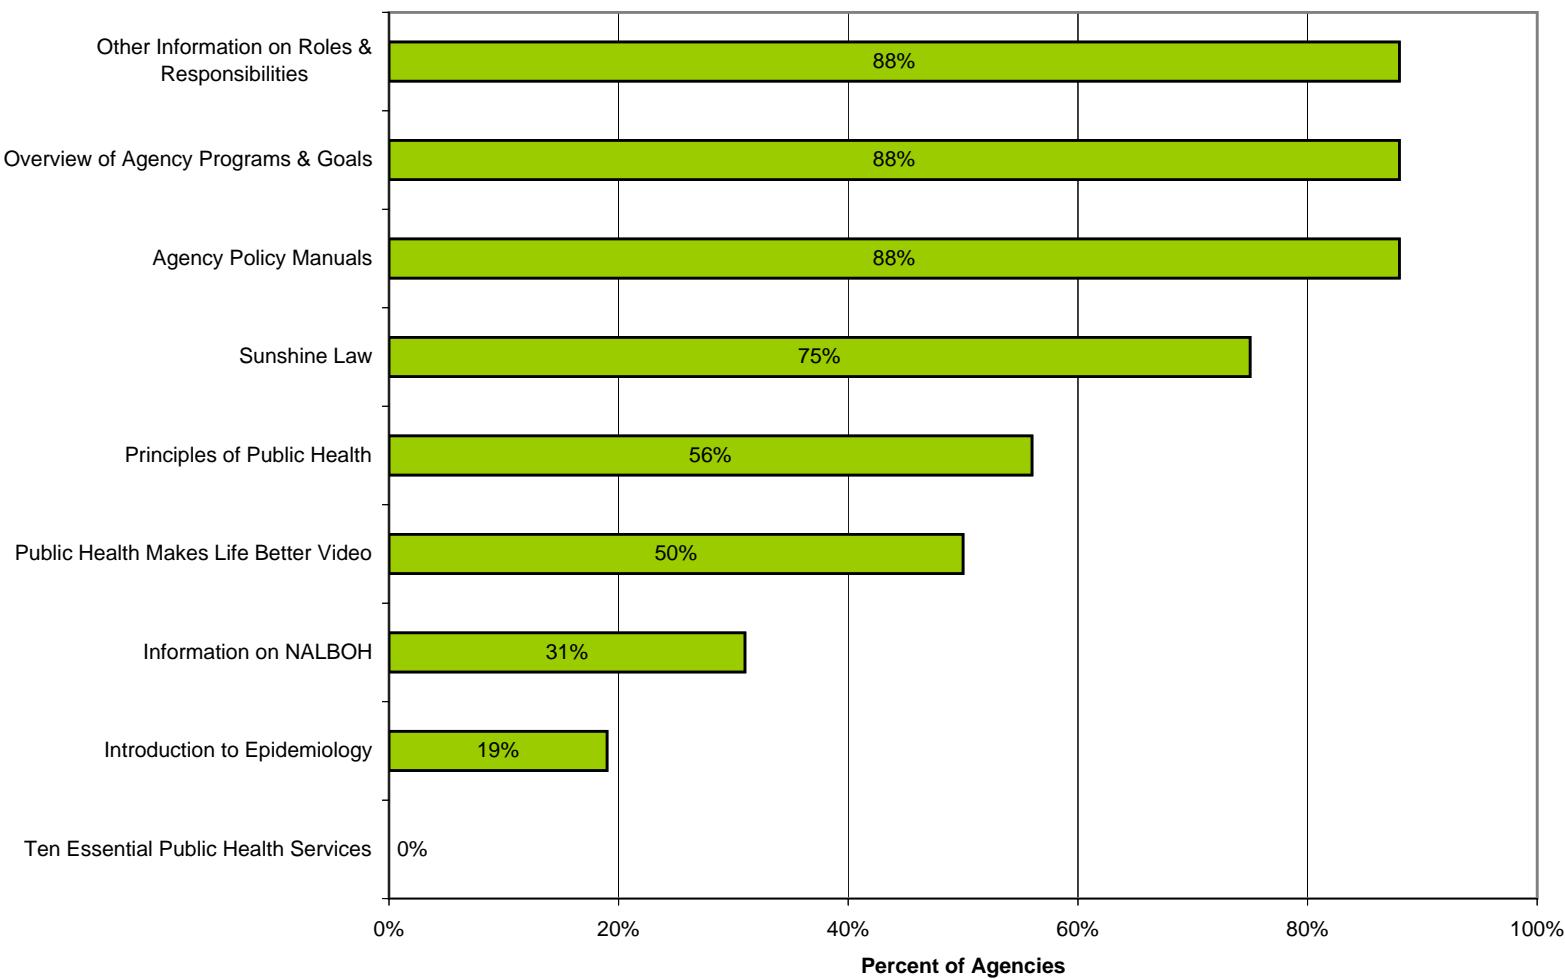

**Agency Provides Printed Information, Verbal, or Other Presentations on the Following - 9.4  
20,000 or Less Population (55 Agencies)**

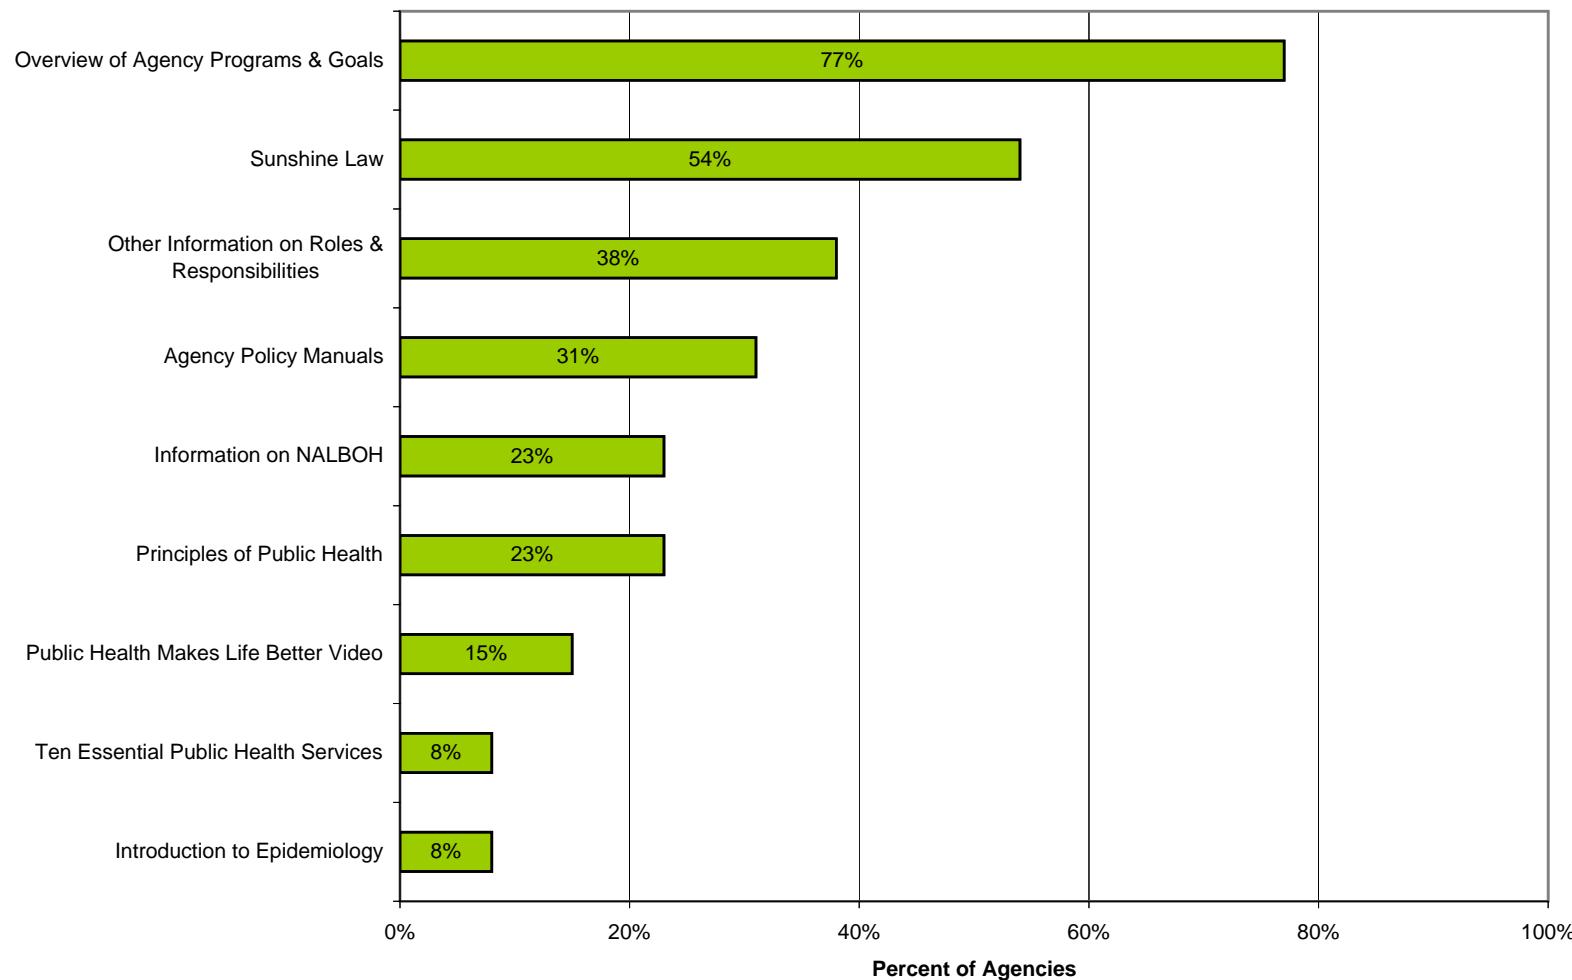

**Agency Provides Printed Information, Verbal, or Other Presentations on the Following - 9.4  
20,001-40,000 Population (30 Agencies)**

**Agency Provides Printed Information, Verbal, or Other Presentations on the Following - 9.4  
40,001-80,000 Population (16 Agencies)**

**Agency Provides Printed Information, Verbal, or Other Presentations on the Following - 9.4  
80,001 or More Population (13 Agencies)**

## DATA TABLES

# CHAPTER 4

## MISCELLANEOUS ACTIVITIES RELATED TO GOVERNING BODIES

### GOVERNING BODIES

	Number	Percent
<b>9.1. Agency is governed by County Commission.</b>		
114 Statewide	18	16%
55 Population up to 20,000	5	9%
30 Population between 20,001 and 40,000	6	20%
16 Population between 40,001 and 80,000	4	25%
13 Population over 80,001	3	23%

### GOVERNING BODIES

	Number	Percent
<b>9.2. Agency uses an Orientation Checklist to orient new governing body members.</b>		
114 Statewide	41	36%
55 Population up to 20,000	22	40%
30 Population between 20,001 and 40,000	12	40%
16 Population between 40,001 and 80,000	4	25%
13 Population over 80,001	3	23%

**9.3. Agency provides new governing body members a printed copy of Public Health Works, or Information on Internet access to Public Health Works.**

	Number	Percent
<b>9.3. Agency provides new governing body members a printed copy of Public Health Works, or Information on Internet access to Public Health Works.</b>		
114 Statewide	94	82%
55 Population up to 20,000	49	89%
30 Population between 20,001 and 40,000	25	83%
16 Population between 40,001 and 80,000	14	88%
13 Population over 80,001	6	46%

## GOVERNING BODIES

**9.4. Agency provides printed information, verbal, or other presentations on the following subjects to orient new governing body members.**

	Statewide - 114		Up to 20,000 Population - 55		20,001-40,000 Population - 30		40,001-80,000 Population - 16		Over 80,001 Population - 13	
	Number	Percent	Number	Percent	Number	Percent	Number	Percent	Number	Percent
Sunshine Law	100	88%	53	96%	28	93%	12	75%	7	54%
Public Health Makes Life Better Video	58	51%	30	55%	18	60%	8	50%	2	15%
Principles of Public Health	52	46%	25	45%	15	50%	9	56%	3	23%
Introduction to Epidemiology	15	13%	7	13%	4	13%	3	19%	1	8%
